

DIJAN PRECIOUS & CRITICAL MINERALS LTD

Who We Are

Dijan Precious & Critical Minerals Ltd is a registered Ugandan company built on trust, transparency, and responsible trade. From Kampala to Copenhagen to New York, we connect East Africa's finest resources Gold, Cobalt, Tungsten, and Niobium, to reputable buyers across the world. Our work is grounded in African warmth and Danish clarity: honest dealings, documented processes, and complete traceability.

Our Values

We stand for integrity, ethical mining, fair wages, and sustainable sourcing. Our partnerships with local miners ensure that communities benefit directly from the minerals extracted. Every deal is handled with discipline, accountability, and full compliance with international export regulations.

Ethical & Sustainable Trade

We work only with verified mining partners who follow safe and responsible extraction practices. Our supply chain is fully documented from mine site to export ensuring buyers receive authentic, conflict-free minerals backed by traceability reports.

Scam Awareness & Buyer Protection

The minerals industry attracts many fraudulent actors. We protect our clients by maintaining full transparency. Genuine dealers never rush buyers, never avoid documentation, and never refuse verification. We encourage all clients to request licenses, export permits, assay reports, and company registration documents we readily provide.

Licenses & Certifications

Dijan is a fully registered mineral supplier with validated export certifications, compliance paperwork, and trade licenses. We have successfully completed over 260 bulk export deals and many smaller retail transactions.

Procurement Process

Our buying process is simple and professional: consultation, verification, sampling, pricing, documentation, payment security, and export clearance. Every step is recorded to protect both the buyer and the supplier.

Message From the CEO — Issa K. Katongole

“At Dijan, we believe minerals are more than resources they are the foundation through which communities grow and nations prosper. Our work reflects respect for the land, the people, and the partners who trust us. Thank you for walking this journey with us as we bring Africa’s richness to the world with honesty and dignity.”

Issa K. Katongole

CEO, Dijan Precious & Critical Minerals Ltd
