COCOPEAT BLOCK

LOW EC | HIGH EC | EXPORT READY

ABOUT US

Anderson Exim is a Thoothukudi-based proprietorship export company specializing in high-quality Low EC & High EC cocopeat blocks. As a trusted Indian brand with a growing global network, we deliver sustainable, reliable, and value-driven growing solutions worldwide.

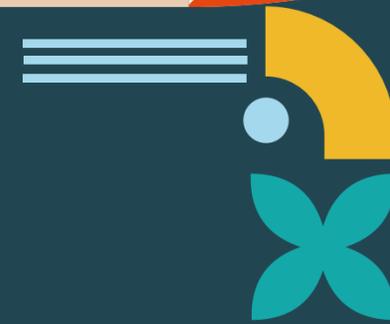

We operate advanced cocopeat production and processing units supported by strict quality systems, ensuring consistency and customer satisfaction. With a dedicated manufacturing unit in Indore and strong sourcing partnerships across South India's top coir regions, we maintain a seamless supply chain and efficient exports through Thoothukudi Port.

Every block we produce reflects our core values — quality, innovation, transparency, and trust — enabling growers and importers to achieve superior results.

Our Focus

- Consistent and certified quality
- Transparent trade and documentation
- Long-term, value-driven export relationships

Anderson Exim is expanding globally with a clear vision: providing world-class agricultural growing mediums from India to the world.

PRODUCT PROTFOLIO

5 KG HIGH EC LOW EC COCOPEAT BLOCK

Anderson Exim Cocopeat Blocks are produced from premium coir pith and engineered to deliver consistent performance across horticulture, hydroponics, nurseries, and professional agriculture. Designed for precision, purity, and reliability, our cocopeat ensures optimum moisture retention, balanced pH, and excellent aeration—supporting healthy root development and superior crop growth.

Low EC Cocopeat Blocks

- Ideal for horticulture, hydroponics, indoor farming, nurseries
- Washed and processed for low electrical conductivity
- Ensures clean, controlled, and nutrient-ready growing conditions
- Provides uniform expansion, high water retention, and easy handling

High EC Cocopeat Blocks

- Suitable for open-field agriculture and commercial soil conditioning
- Naturally nutrient-rich with higher mineral content
- Enhances soil structure, aeration, and moisture balance
- Cost-efficient and effective for large-scale farming applications

Cocopeat is a natural, eco-friendly growing medium known for its water-holding capacity, aeration, and sustainability—making it a preferred choice worldwide.

With strong Indian manufacturing excellence, Anderson Exim stands as a trusted supplier for global buyers seeking reliable, high-value growing mediums.

PRODUCT SPECIFICATIONS

High EC Cocopeat

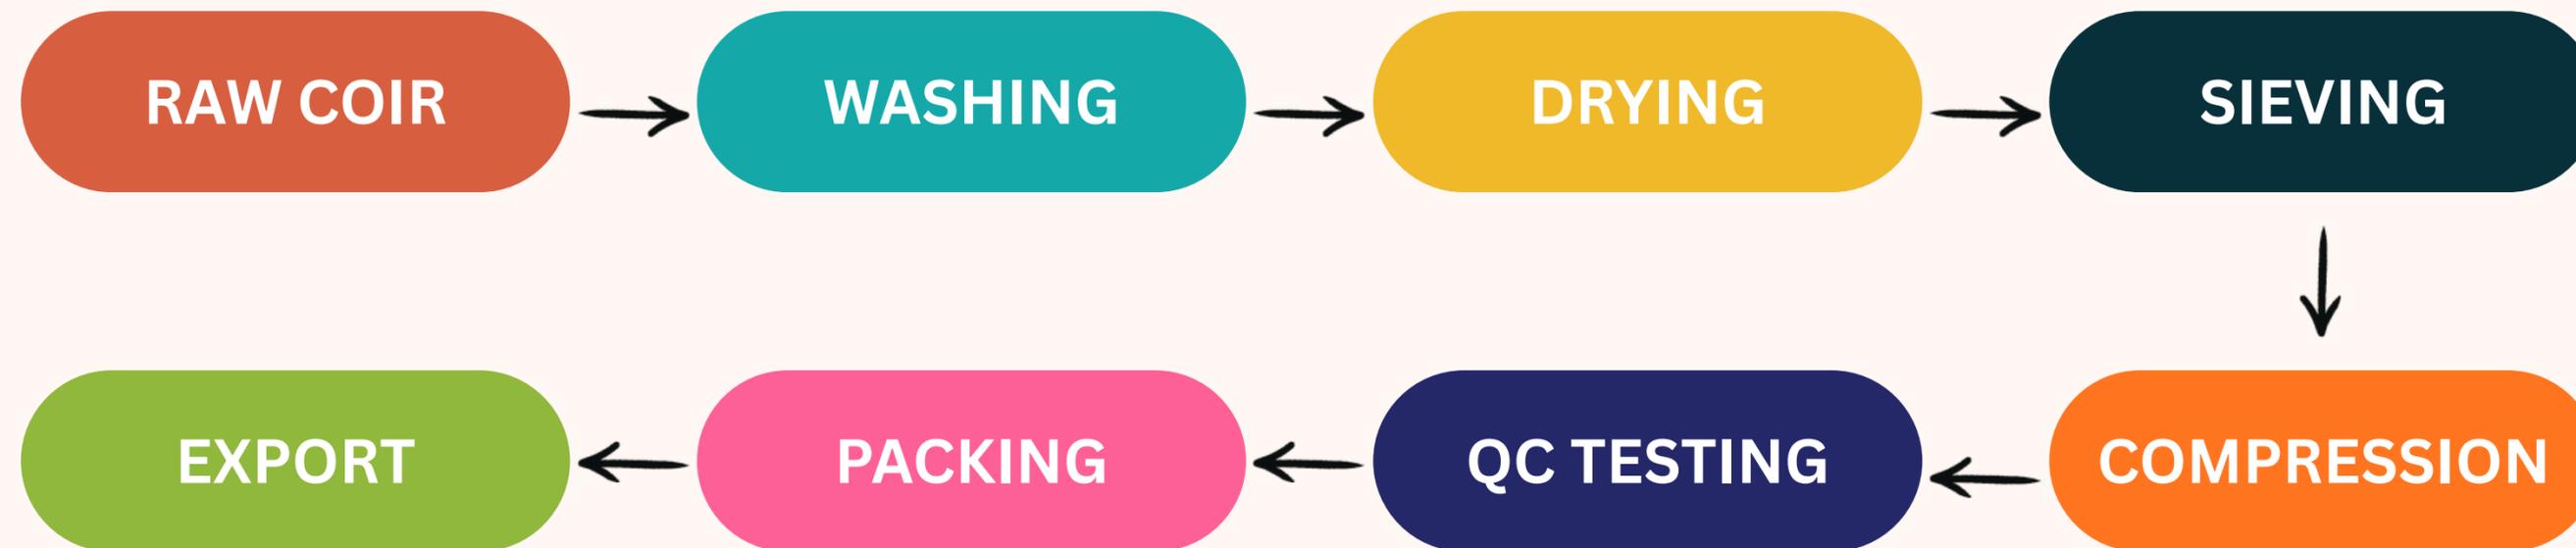

Type:	High EC Cocopeat
Form:	5Kg Compressed Block
Compression Ratio:	5:1
Block Size in Cm:	30*30*10 (or) 30*30*12
Moisture:	< 15%
Ph	5.5 – 6.8
Expansion Volume:	70–75 Litres
Mesh Size:	4mm / 6mm)
Material:	100% Coir Pith

Low EC Cocopeat

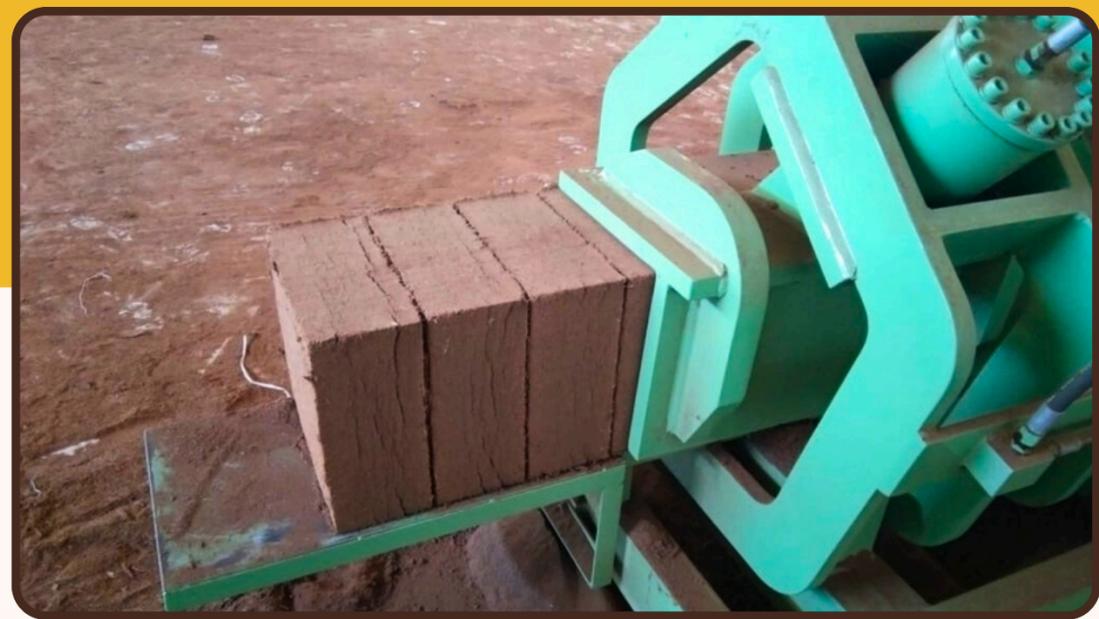

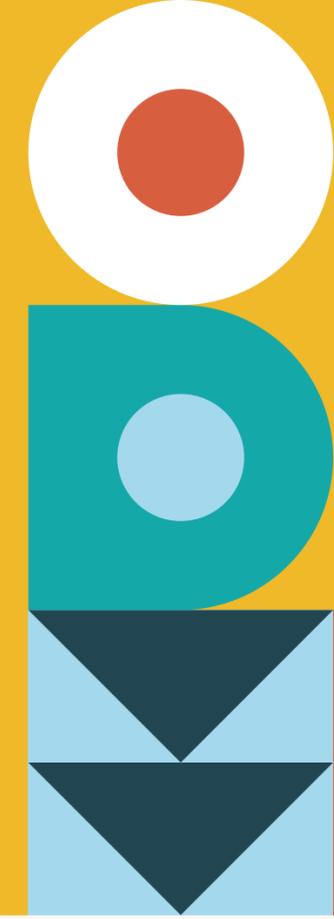

Type:	Low EC Cocopeat
Form:	5Kg Compressed Block
Compression Ratio:	5:1
Block Size in Cm:	30*30*10 (or) 30*30*12
EC Level:	< 0.5 mS/cm @1:1.5 ratio
Moisture:	< 15%
Ph	5.5 – 6.5
Expansion Volume:	70–75 Litres
Mesh Size:	4mm / 6mm
Material:	100% Washed Coir Pith

PACKAGING **TYPE**

PALLETIZED EXPORT PACKING

TYPE	20 ft / 40 ft Container Pallet Load
WEIGHT <small>Per Pallet</small>	Approx. 1.3-1.5 MT
PACKING	250-270 Blocks Per Pallet <small>(non-palletized up to 5,200 blocks per 40 ft)</small>

FEATURES

- **Easy container loading/unloading**
- **Strong wrapping for long-distance transport**
- **Prevents deformation and moisture exposure**

*Recommended For: International bulkshipments, long-distance export

PALLET PACKING FEATURES

Durable Export Wrapping
Multi-layer stretch film with corner protection

Weight Optimization
Perfect stacking for balanced pallet load

Protection from Moisture
Wrapped with UV-stabilized, moisture-resistant film

Quality Checks
Each pallet verified for weight, size, and wrapping integrity

Secure Loading
Blocks aligned and strapped to prevent shifting during transit

CONTAINER LOADING OPTIONS

CONTAINER TYPE	CAPACITY (APPROX.)	LOADING TYPE	REMARKS
40 Ft Container	24 - 26 MT	Palletized	= 4,800 - 5,000 Blocks
