## Company Overview

# PT. Stara Briket Semesta

PT. Stara Briket Semesta is a premium charcoal briquette manufacturing company established in 2025, based in North Sumatra, Indonesia. Specializing in high-quality Hookah/Shisha briquettes and BBQ briquettes made from premium coconut shell charcoal, the company is committed to delivering sustainable, efficient, and globally competitive energy solutions.

With a production capacity of 1–2 tons per day, PT. Stara Briket Semesta serves domestic and international markets with customizable briquette solutions tailored to wholesalers, distributors, and private label buyers.

# Shisha / Hookah Briquette

Crafted from premium coconut shell charcoal, our Hookah Briquettes deliver long-lasting heat, low ash content, and a clean, odorless smoking experience. Designed for consistent performance, they provide stable heat distribution and extended burning time, making them ideal for lounges, distributors, and hookah enthusiasts worldwide.

# Process Overview

## RAW MATERIAL SELECTION

High quality coconut shells are selected to ensure low ash content, high density, and clean burning performance.

## CARBONIZATION

Coconut shells are carbonized in a controlled high-temperature kiln to produce high-quality charcoal.

## CRUSHING & SCREENING

Charcoal is crushed and screened into fine particles with uniform size for better consistency.

## MIXING

Charcoal powder is mixed with food-grade tapioca starch and water in the right composition.

## PRESSING

The mixture is pressed into cube shape (25x25x25 mm) using hydraulic briquette machines.

## DRYING

Briquettes are dried in a dryer machine to reduce moisture and improve durability.

## COOLING

Briquettes are cooled down naturally or with cooling system to maintain quality and prevent cracking.

## QUALITY CONTROL

Each batch is inspected for size, density, moisture, ash content, strength, and appearance.

## PACKAGING

Approved briquettes are packed in carton boxes with inner plastic for protection and easy handling.

From raw material selection to final packaging, our quality assurance process guarantees export-grade coconut shell charcoal briquettes you can trust.

## Quality Assurance

Quality Comes First  
Every batch undergoes:

- ✓ Moisture Testing
- ✓ Ash Content Testing
- ✓ Dimensional Inspection
- ✓ Packaging Inspection
- ✓ Batch Traceability
- ✓ Burn Performance Testing

# Custom Packaging & OEM

We offer customized packaging, private label services, custom dimensions, and customer-specific product specifications for international distributors and wholesalers.

## Hexagonal Star Shape

Our Hexagonal Star Shape Charcoal Briquette is engineered for superior heat performance, extended burning time, and efficient airflow.

## Engineered for Global Markets

Our charcoal briquettes are specifically manufactured to meet international export requirements and global market standards. Produced from high-quality coconut shell charcoal, they offer consistent quality, long burning time, high heat output, low ash content, and reliable performance. We provide flexible specifications, customized sizing, private labeling, and export-compliant packaging to meet the needs of distributors, wholesalers, and importers worldwide. Quality control is implemented throughout the production process to ensure every shipment meets customer expectations and international trade requirements.
