

Pitch Deck

An AI Drone Powered Targeted
Marketing Company

- Build a mass data analyzer gather data of entire cities and sell off the data to home renovation companies, Roofing Companies, Drainage Companies, Window Companies, Landscaping Companies, Shed Companies, and MORE...
- So that companies can do targeted marketing

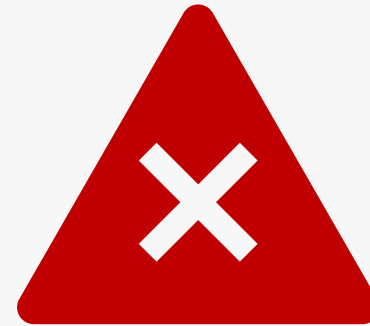

The Problem We Solve

Home renovation companies alone spend billions on marketing. With targeted marketing, you could now send marketing only to your desired market.

A business will no longer need to wait for a customer to realize that they have a problem. This could revolutionize the conventional way of getting leads

The problem instead could be detected and sent off to the company to tell the potential customer that they have a problem.

R&D

-
- We have contacted teams of engineers based in Canada responsible for drone innovations within the country. Avestec has agreed to help us with our R&D testing for free.
 - The drone is being built by Braedon Power, a drone racing national champion and a part-owner of this company.
 - The AI system has also been built by Braedon Power; however, accuracy is still being worked on.

“If this comes to fruition, I will definitely use your services; it will put me ahead of my competition and save me money”.

– A landscaping company in Vancouver

Costs: Drone

Camera 5000

Miscellaneous 2500

Problems We Are Solving

This will revolutionize the conventional way of getting leads.

Conventionally leads are made by people recognizing that they have a problem that needs to be solved. We are telling them they have a problem that needs to be solved.
