

# E-COMMERCE BOOKKEEPING COURSE

E-Commerce Bookkeeping is a practical, job-ready course designed to teach learners how to accurately record, reconcile, and report financial activity for online businesses selling through platforms such as Shopify, Amazon, Etsy, eBay, WooCommerce, and other payment channels. Students will learn how e-commerce transactions flow from order to payout, how to handle sales tax and fees, and how to properly classify revenue, discounts, refunds, chargebacks, shipping income/expense, and cost of goods sold (COGS). The course emphasizes real-world bookkeeping workflows, including bank and processor reconciliations, inventory and COGS tracking, and month-end close procedures using common accounting systems (e.g., QuickBooks Online or similar). By the end of the course, students will be able to maintain clean books for an e-commerce business, produce accurate financial statements, and support informed business decisions.
