

Dear Brothers and Sisters,

Greetings from Santa Cruz, Bolivia. It is raining every other day, so the plants are doing great. They are very beautiful at this time of the year.

We have had chikungunya. It is a disease transmitted by a mosquito, and it starts off with a high fever for a few days. It also causes terrible joint pain that can last for months or in some cases, years. We are still feeling the aftermath from the disease. Please pray for us.

We thank the Lord that Enoel arrived last night from a two-week trip to Canada and the USA. He was able to have a check up on his eyes after surgery, visit some churches, and visit some brothers who have partnered with us in the ministry. The good news is that his medical checkup went well. His eye tests show that he is within a normal range right now.

**We are thankful to the churches who have offered to send a container to Bolivia with items that are needed in the ministry. If you would like to get involved, please contact Don Mackay at Tavistock Bible Chapel, or John Aldom at Southdale Bible Chapel. We would also like to thank those brothers who step in when there is a need and provide for the Lord's work through MSC.**

Now that Enoel has returned, we have many preparations for the boat ministry that is coming up in May. We will be sorting out medications, buying diesel for the boat, purchasing food for the trips, and so on. Please pray for this ministry.

Once again, we would like to express our gratitude to all involved in supporting this ministry. **We really appreciate you**. Now, we would like to share some special prayer requests with you.

1. Please pray for the boat ministry and the preparations that have to be made.
2. Please pray for the restoration of our health.
3. Please remember the volunteers who will join us on all of the boat trips.
4. Please pray that the village people will be receptive to the gospel message and salvation.

We are thankful for your prayers and support. May the Lord bless you!

His servants to Bolivia,  
Enoel and Leisa Suarez
