About Us

Archentara operates through a collaborative ecosystem that connects communities, academia, industry, government, and financial institutions. Local farmers and community groups serve as the stewards of Indonesia's biodiversity resources, while academic and research institutions contribute scientific validation and technological innovation.

Archentara strengthens supply chains, scales production, and expands market access. This integrated approach enables the transformation of Indonesia's natural resources into standardized, high-value bio-ingredients for global markets while creating inclusive economic opportunities for local communities.

Who We Are

Through this ecosystem approach, we strive to create inclusive growth, where local communities not only supply raw materials, but also share in the value and opportunities generated along the entire value chain.

Company Mission

To develop and standardize high-quality bio-ingredients derived from Indonesia's biodiversity through continuous research and innovation. To build an integrated value chain from responsible upstream sourcing to scalable downstream commercialization. To deliver products that generate sustainable economic value while creating positive impact for communities and the environment.

Our Featured Products

01 Papua red fruit oil (extract)

Sourced from Papua, Papua Red Fruit is rich in natural antioxidants and carotenoids. We process it into high-quality oil and extract forms suitable for nutraceutical and functional food applications.

02 Nutmeg butter

Our Nutmeg Butter, made from high-quality Fakfak nutmeg, is a stable, plant-based fat used in cosmetics, personal care, and specialty foods. It is processed for consistent quality and offers a warming effect ideal for winter, serving as a relaxant.

03 Cocoa Powder (Alkalized & Natural)

Cocoa beans from eastern Indonesia flourish in a distinct environment influenced by climate, soil, and slow cultivation, resulting in unique harvests with layered flavors, from earthy depths to subtle fruitiness.

04 Cocoa Butter

Abaca fiber comes from *Musa textilis*, a banana species grown for its strong fibers rather than fruit. It thrives in tropical regions and is lightweight yet very durable, making it one of the strongest natural fibers worldwide.

Our Finished Good Products

01

Red Papua Artisan Soap

A premium artisan soap crafted with red fruit oil and nutmeg extract to gently cleanse while helping nourish and refresh the skin. Rich in natural antioxidants and warm botanical aroma, this soap delivers a luxurious bathing experience with a distinctive tropical character. Suitable for daily use.

Other Products

01 FakFak nutmeg candy

This candy is sourced exclusively from Fakfak, Papua, known as an original nutmeg stronghold in Indonesia. The region's rich coastal-tropical environment enhances the nutmeg's aroma and flavor, making it unique and difficult to replicate elsewhere.

02 White Sesame

This candy is sourced exclusively from Moyo Island, known for its rich history in nutmeg cultivation. The region's coastal tropical environment enhances the nutmeg's aroma and flavor, making it unique compared to other areas.

03 Black Sesame

Black sesame from Moyo Island is cultivated in fertile coastal soil and tropical conditions, producing seeds with a bold nutty flavor, deep black color, and natural oil richness suitable for premium culinary and wellness products.

Our Business Ecosystem

Archentara builds an integrated ecosystem that connects research institutions, local communities, industry partners, and financial support to transform Indonesia's biodiversity into functional ingredients.

Research Collaboration

Focus research:

- Bioactive compounds
- Functional food development
- Nutraceutical & cosmetic development
- Standardization & COA

Education & Community Development

Programs:

- Social Forestry empowerment
- Sustainable harvesting
- Biodiversity conservation
- Community based production

Market & Industrial Application

Applications:

- Nutraceutical products
- Healthy food & beverage
- Botanical cosmetics

Financial & Policy Support

Government alligment:

- MSME development
- Export market access
- Financing ecosystem
- Biodiversity value chain scaling
