

NEXURE RD 40 Capsules

Esomeprazole & Domperidone Capsules

Product Overview

Nexure RD 40 Capsules is a combination of Esomeprazole Magnesium (Enteric Coated) and Domperidone (Sustained Release), formulated to provide effective management of acid-related gastrointestinal disorders associated with delayed gastric emptying.

The enteric-coated Esomeprazole reduces gastric acid secretion, while sustained-release Domperidone helps improve gastric motility, offering comprehensive symptom control in acid reflux-related conditions.

Composition

- Esomeprazole Magnesium (Enteric Coated) – 40 mg
- Domperidone (Sustained Release) – As per approved formulation

Indications

- Gastroesophageal reflux disease (GERD)
- Acid reflux and heartburn
- Acid-peptic disorders
- Functional dyspepsia associated with delayed gastric emptying
- Nausea and bloating associated with hyperacidity
- (As prescribed by the physician)

Key Features

- Dual-action therapy: acid suppression + prokinetic support
- Enteric-coated Esomeprazole for targeted acid control
- Sustained-release Domperidone for prolonged gastric motility support
- Helps relieve heartburn, regurgitation, bloating, and nausea
- Suitable for once-daily dosing (as advised)

Dosage & Administration

As directed by the physician.

Usually advised to be taken before meals or as prescribed.

Who Should Use Nexure RD 40

- Patients with GERD or acid reflux symptoms
- Individuals with acid-related disorders and gastric motility issues
- Adults requiring combination PPI + prokinetic therapy
- (Prescription use only)

Storage Instructions

Store in a cool, dry place away from direct sunlight.
Keep out of reach of children.
