ZAMBELLI INTERNATIONAL CONSULTING LLC

Official Statement – Interest Income Results | April 2026

Zambelli International Consulting LLC is pleased to announce a significant financial milestone, reflecting the strength of its investment strategy and the continued confidence of its strategic partners.

Monthly Interest Income

For the month of April 2026, the Company has generated interest income in the amount of: USD 1,769,760,048.46 (One billion seven hundred sixty-nine million seven hundred sixty thousand forty-eight United States dollars and 46/100)

This performance is the result of disciplined financial management, strategic diversification, and precise execution within high-yield market environments.

Strategic Projection (Simple Interest Basis) Under a simple interest framework, the Company projects sustained and scalable growth:

Initial Term: 12 Months (through May 2027) USD 21,237,120,581.52 (Twenty-one billion two hundred thirty-seven million one hundred twenty thousand five hundred eighty-one United States dollars and 52/100)

Extended Term: 18 Months (through November 2027) USD 31,855,680,872.28 (Thirty-one billion eight hundred fifty-five million six hundred eighty thousand eight hundred seventy-two United States dollars and 28/100)

All taxes, levies, duties, or other fiscal obligations arising from the generated interest income shall be borne exclusively by the debtors; accordingly, the Company shall receive such interest proceeds free of any direct tax burden, resulting in enhanced and preserved net cash flow and an optimized effective yield for investors on a gross-receipt basis, provided that such allocation remains subject to the terms of the applicable contractual agreements and the governing laws and jurisdictions.

Implications for Stakeholders: The Company delivers consistent liquidity through predictable and recurring income streams, while maintaining scalability that enables increased exposure without impairing returns; performance is validated by verifiable financial metrics, and a clear competitive advantage is achieved through access to structured financial instruments with optimized risk-return profiles. The reported results reinforce a highly efficient financial model characterized by high-volume recurring income generation, time-scalable projection capability, tax-efficient structuring, and readiness to transition into compound interest frameworks to further maximize returns.

“These results strengthen our position as a leading firm in international financial structuring. Our priority remains unchanged: capital preservation, yield optimization, and the sustained creation of value for our investors.”

At Zambelli, we do not merely generate figures — we create global financial opportunities, and this performance further solidifies our value proposition while positioning the Company as a trusted strategic partner in an increasingly complex financial landscape.
