

STOP WASTING SPACE UNDER YOUR KITCHEN SINK

Do This Instead

Why This Space Feels Impossible

- Plumbing blocks usable space
- Everything gets stacked in one pile
- No vertical organization
- Hard to see what you own

*The problem isn't the cabinet.
It's the layout.*

STEP 1 Install a 2-Tier Pull-Out Organizer

- ✓ Use vertical space
- ✓ Work around plumbing
- ✓ Pull everything out easily

Instantly doubles usable storage

STEP 2 Create Zones with Clear Stackable Bins

- ✓ Dishwasher pods
- ✓ Trash bags
- ✓ Cleaning cloths
- ✓ Sponges
- ✓ Backup supplies

See everything at a glance

STEP 3 Use the Cabinet Door

- ✓ Slim rack for bottles
- ✓ Small caddy for brushes
- ✓ Hooks for gloves

Frees up 20–30% of bottom space

WHAT THE FINISHED SETUP LOOKS LIKE

- **Top:** Tension rod with spray bottles
- **Middle:** 2 Tier pull-out organizer
- **Bottom:** Clear bins by category

You don't need a new kitchen. You need a smarter layout.

- One pull-out organizer ● Stackable bins ● A door rack ● A tension rod

Transform this space in under an hour.
