Sustainability

Sustainability is woven into every detail: walls are finished with **Kourasanit natural plaster/paint**, a breathable, **low-VOC coating** that supports healthy indoor air quality and reduces environmental impact.

Green roofs with native vegetation enhance local biodiversity, while the **earth-sheltered construction** seamlessly blends the residences into the landscape.

For both construction and furnishings, only natural materials such as **solid wood** were chosen, avoiding synthetic finishes to **minimize the ecological footprint** further.
