

Engineering Design Works

- Engineering design and construction for all hydraulic systemspreparation of documentation
- Hydraulic equipment based on those designed documentspreparation
- Calculation of technical conditions for hydraulic systems
- In the framework of the project, materials and spare partssupply
- Assembly of hydraulic equipment
- Implementation of the hydraulic project with the (turnkey) principle

Our engineers work on all types of engineering projects within the framework of other projectsadvice and provides technical support, including:

- Design of new hydraulic lines and systems
- Design of new hydraulic lines and systems
- Modernization of outdated hydraulic systems and equipment
- Determining compatibility of various equipment
- Economic justification of projects

At the end of the project, you will be presented with:

- All calculations about the project
- Working drawings
- Spare parts list
- Test certificate for assembled hydraulic equipment

Complete electro-hydraulic modernization and repair:

- Faucets
- Hydraulic systems
- Hydraulic equipment
