

Streamline Compliance & Facility Support

At Streamline, we know property managers juggle more than just cleaning needs. That's why we offer **light facility support** as an add-on service. Our goal is simple: keep your properties safe, compliant, and running smoothly without the stress of chasing small work orders.

What we cover:

- Smoke detector checks & replacements
- Water meter readings & reporting
- Minor safety walkthroughs (lights, batteries, trip hazards)
- Tenant access support during inspections

What we don't do:

- No plumbing, electrical rewiring, or structural repairs
- No large-scale construction or contractor work

By focusing on **routine compliance and light support tasks**, we give you peace of mind that the "little things" won't get overlooked and your inspections will go smoother.
