

Bringing Our 5-Star Service To Columbia, Jefferson City, and Lake of the Ozarks!

Concrete Lifting/Leveling: Polyjacking

We lift, level, and repair your uneven concrete.

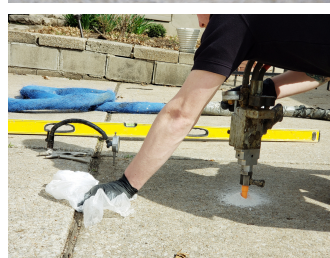

PolyMagic takes the time to understand your concrete concerns. Our polyjacking process begins by drilling tiny holes (5/8") and injecting polyurethane foam under the concrete. This raises the concrete. Polyjacking is the most efficient and effective concrete lifting/raising process on the market.

Areas that can benefit from polyjacking include:

- Driveways
- Concrete Stairs
- Sidewalks
- Pool Areas
- Garages
- Patios
- Foundation Slabs
- Porches
