VIP PROTECTION

We offer a variety of high-quality Security, close protection services to our esteemed Clients

OUR PRODUCTS

CCTV

We are supplying, Installation, and Maintenance of CCTVs and surveillance systems for homes, offices and government provides physical security, remote monitoring, intrusion detection and all-round protection to meet the security concerns for people, assets and systems.

ALARMS INTRUSION

Systems: Our intrusion systems are designed to provide a 24/7 protection to our customer premises, for every activation on the system a text sms our alert signal via an app is sent to the customer.

GUARDS MONITORING AND CONTROL ROOM SOLUTION

The guards monitoring system provides real-time means of monitoring the patrols of all the guards on duty. This can be achieved through the control room solution or by retrieving reports from the client PC running the control room applications.

ACCESS CONTROL SYSTEMS

Access control enables you to control who has access to your building. Locks and keys also allow you to secure your building, but when keys are lost or stolen, the inconvenience and expense of changing locks and re-issuing keys can be considerable. Keys may also be copied, creating even more security risks.

TIME AND ATTENDANCE SYSTEM

Time and Attendance software reduces the risk of human error and ensures an easy, impartial, and orderly approach in addressing specific needs without any confusion. In fact, Time and Attendance software has been shown to have an accuracy rate of more than 99% versus manual systems by eliminating errors in data entry and calculations.

METAL DETECTORS

A metal detector is an electronic instrument which detects the presence of metal nearby. Metal detectors are useful for finding metal inclusions hidden within objects, or metal objects buried underground. They often consist of a handheld unit with a sensor probe which can be swept over the ground or other objects.

GATE / ROAD BARRIERS

A road barrier is the most functional and at the same time attractive solution for controlling public and private vehicle transit and access to rest areas, even with high traffic volumes. Barriers are designed to professionally control every type of access

COMMUNICATION

Wireless communication brings a fundamental change to data networking & telecommunication. We provides: , WI-FI Solutions , Point to Point Links (Licensed and Unlicensed) , Point to Multi Point Links , Radio Communication (Digital Mobile Radio) , Smart Building Management Systems and PABX systems

FLEET MANAGEMENT

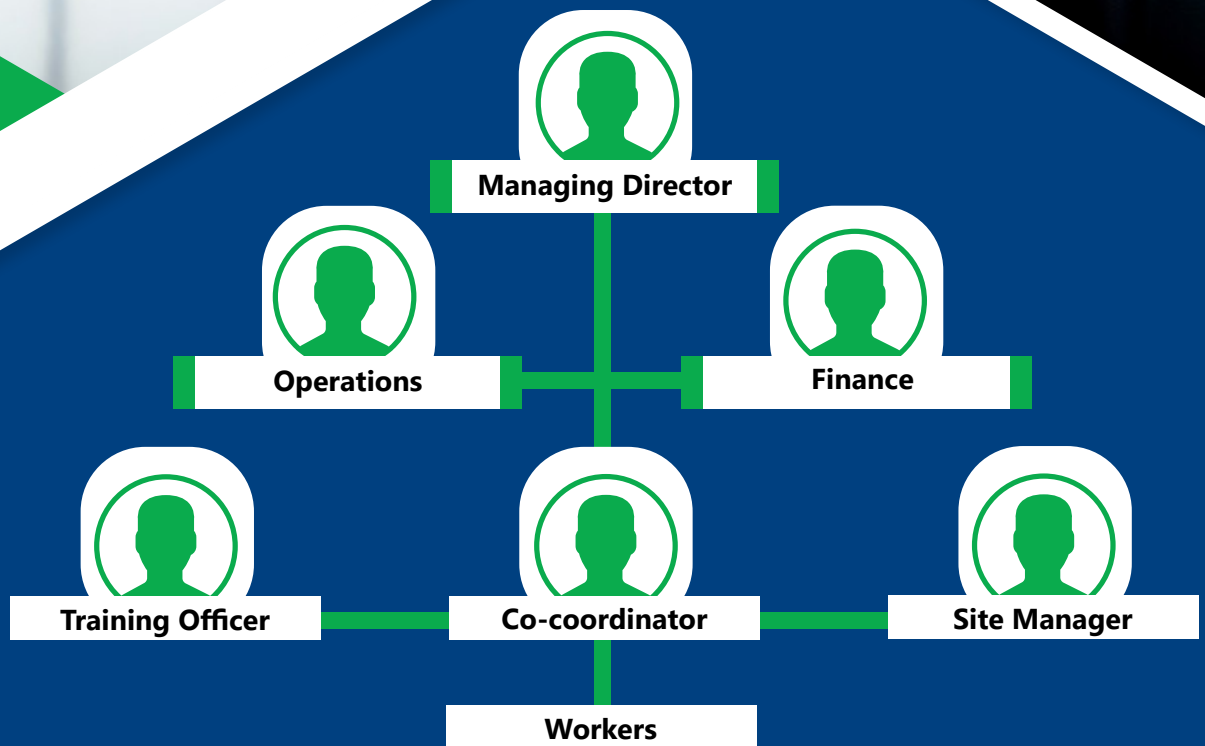

Vehicle tracking and fleet management This service is available for personal vehicles, fleet owners, heavy machinery owners and basically anyone with a vehicle. It is also useful for banks offering asset finance loans to ensure that the vehicle can be regained if the borrower forfeits the loan. Features - Live in-transit vehicle monitoring
