PROFILE

A results-driven 4th-year Information Systems Engineering student who transforms a passion for technology into tangible projects in cybersecurity and AI. I have proven my problem-solving abilities by developing an automated penetration testing tool and an AI project for Occupational Health & Safety that performs real-time equipment monitoring via camera feeds. With my skills reinforced by Ministry of Industry and Technology-approved SiberVatan certifications, I am seeking to build a career by contributing to innovative and challenging projects.
