

Numerical Analysis and Scientific Computation with Applications

NASCA26

Kalamata, Greece, 09–12 June, 2026

<https://nasca26.org>

PLENARY SPEAKERS

Stefano Serra-Capizzano (Italy)
Marco Donatelli (Italy)
Stelios Georgiou (Australia)
Marcos Raydan (Portugal)

Lothar Reichel (USA)
Yousef Saad (USA)
Hassane Sadok (France)

ORGANIZING COMMITTEE

Oumayma Banouar (Morocco)
Nikoloas Bardis (Greece)
Mustapha Hached (France)

Khalide Jbilou (France)
Christos Koukouvinos (Greece)
Marilena Mitrouli (Greece)

The main topics of the conference are:

- Numerical Linear and Multilinear algebra.
- Numerical methods for PDEs. Control and model reduction.
- Ill-posed problems and regularization.
- Approximation-Optimization.
- Machine learning, computer vision and image processing
- Computational statistics

Selected papers will be published in international peer-reviewed journals

The conference is organized by

- Department of Mathematics, National Kapodistrian, University of Athens, Greece.
- Laboratory of Pure and Applied Mathematics, University Littoral Côte d'Opale, France.
