

Sistema tubular flexible

REMAK MEXICO

Remak Mexico

SISTEMAS INDUSTRIALES REMAK nuestra política de servicios es ofrecerle a nuestros clientes producto y servicio con la mejor calidad para mejorar continuamente lo cual ponemos a su consideración el siguiente catálogo de componentes en sistemas tubulares de la marca Samsung así como nuestros servicios de fabricación.

Los sistemas tubulares REMAK son la mejor herramienta para conseguir un flujo continuo en transferencia de materiales y en sistemas de almacenamiento para proporcionar facilidades a las líneas de producción cumpliendo con los criterios estandarizados de Lean Manufacturing. Describiendo visualmente todos los componentes que contiene nuestro catálogo así como ayuda de información técnica y algunas aplicaciones fabricadas por nuestra empresa.

Especificaciones:

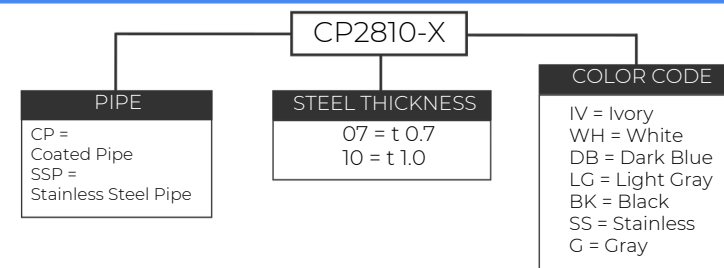

- Recubrimiento: ABS
- Diam. Exterior: 28 mm
- Longitud: 4mts
- Espesor de 1.0 mm
- Acero Rolado en Frio
- Peso: 2.6 kg/Tramo
- Atado: 10 Tramos

Restricciones:

ABS no usar a interperie, ambiente de soldadura, ni exponer a solventes o aceites solubles como thinner.
