

A large, dark-toned photograph of a modern high-rise building with a unique, angular, and faceted facade. The building's surface is a complex geometric pattern of light-colored panels and dark blue triangular windows. Two workers in safety gear and harnesses are visible: one is working on a window on the left side, and another is standing on a triangular panel on the right side. The sky is a clear, pale blue.

High-Rise Services in USA

Specialists in window cleaning and high-rise building maintenance, delivering safety, efficiency, and professional results.

BCN/VERTICAL

About Us

Hello! My name is David García

Founder of BCN Vertical and IRATA Level 3 Supervisor (3/52376), with over **12 years of experience in high-risk**, difficult-access work across civil construction, oil and gas, and wind energy.

Proven expertise in structural maintenance, facade rehabilitation, offshore platforms, and wind turbine repairs, meeting **the highest international safety standards**.

Committed to safe execution, quality results, and on-time delivery.

BCN/VERTICAL

Our Mission

At BCN Vertical, our mission is to **lead the high-rise and difficult-access work** sector by delivering safe, efficient, and high-quality solutions. We specialize in industrial maintenance, facade restoration, and cleaning services, consistently meeting the highest standards of safety and sustainability.

Our commitment is to provide customized services that exceed our clients' expectations, using innovative and environmentally responsible techniques. **We are dedicated to building long-term, trust-based relationships founded on excellence and reliability, ensuring outstanding results on every project.**

BCN/VERTICAL

Services

Exterior Maintenance

We provide professional facade restoration services across various locations, delivering efficient, high-quality results through environmentally responsible pressure washing techniques.

Window Cleaning Services

Professional rope access window cleaning services that deliver safe, efficient results without the need for platforms, tailored to each client's requirements.

Anchor Point & Lifeline Certification

We inspect and certify anchor points and lifeline systems to ensure safe work at height, verifying full compliance with the EN 795:2012 safety standard.

BCN/VERTICAL

Projects

We have over 12 years of experience delivering **international projects across the United States**, Sweden, Norway, Finland, and Spain, as well as offshore oil platforms in the Gulf of Mexico - **covering civil construction and renewable energy sectors**.

Roof section replacement at Arthur Ashe Stadium, Flushing Meadows, New York.
