

2 TR ONLINE AQUA CHILLER – HEAVY DUTY MODEL

2 TR Online Aqua Chiller is a heavy-duty, low-maintenance cooling system designed for continuous industrial applications. It is equipped with a coaxial coil heat exchanger that ensures fast and efficient cooling with smooth and reliable operation. This model is ideal for RO plants, beverage processing and water cooling applications.

The chiller features a digital temperature controller and water flow switch for precise temperature regulation and operational safety. Its robust design, along with essential safety features, ensures long-lasting and trouble-free performance.

Technical Specifications:

- Cooling Capacity: 2 TR
- Type: Online Aqua Chiller
- Condensing Unit: Single HP, 50 Hz
- Heat Exchanger: Coaxial Coil Type
- Pump: Water Pump with SS Neck
- Control System: Digital Temperature Controller

Key Features:

- Coaxial Coil Heat Exchanger for quick and efficient cooling
- Digital Temperature Controller for accurate temperature setting
- Water Flow Switch ensures safe operation and protects the system
- Heavy Duty Condensing Unit suitable for continuous usage
- Low Maintenance Design with easy operation
- Equipped with Required Safety Features for reliable performance
- Ideal for RO Plants, Beverage & Industrial Cooling Applications
