

5 TR ONLINE AQUA CHILLER – HEAVY DUTY MODEL

5 TR Online Aqua Chiller is a high-performance, heavy-duty cooling system designed for continuous industrial and RO plant applications. Available in Shell Type or Coaxial Type heat exchanger, this chiller ensures efficient cooling with stable and reliable operation. Built with a CNC-fabricated heavy-duty body, it is suitable for demanding working conditions.

The unit is equipped with an auto sensor and digital temperature display for precise temperature monitoring and control. Its air-cooled design ensures efficient heat dissipation with low maintenance requirements.

Technical Specifications:

- Cooling Capacity: 5 TR
- Type: Online Aqua Chiller
- Heat Exchanger: Shell Type / Coaxial Type
- Power Supply: 3 Phase, 50 Hz
- Cooling Type: Air Cooled
- Body: Heavy Duty CNC Fabricated
- Control System: Auto Sensor with Digital Temperature Display

Key Features:

- High-Efficiency Cooling Performance for continuous operation
- Shell / Coaxial Heat Exchanger for fast and effective cooling
- Digital Temperature Display for accurate monitoring
- Auto Sensor System for safe and reliable operation
- Heavy Duty CNC Fabricated Body for long service life
- Low Maintenance & User-Friendly Design
- Ideal for RO Plants, Beverage & Industrial Cooling Applications
