Automatic Inkjet Coding Machine with Conveyor

This is an "ANSAR" make INKJET Coding Machine model PRO S for printing on porous & non-porous surfaces like PET, metal, plastic, wood & paper. It can be used for printing on bottles, caps, labels, boxes, bags etc. It has the following unique features: Cartridge is suitable for 2.5 lakhs to 2.75 lakhs prints of three lines each which makes it extremely cost effective. Display of the printer of 3.5 inch LCD screen with LED back light. User interface has a simple and easy to use operating system. Input device is a pocket sized IR remote key pad. Available languages are Chinese, English, German, Spanish etc. Size of the printer is 119 mm x 78.8 mm x 76.0mm. Weight is 550 gms. Mounting orientation can be horizontal or vertical. Operating temperature is 5 degrees Celsius to 50 degrees Celsius. Data interface is RS485, USB port. Can be integrated with FFS machines, band sealers, taping machines and other packing machines for printing on labels, bags and pouches. The most significant advantage of the U2-ProS and TIJ printers in general is that they are virtually zero maintenance devices. Once a cartridge is exhausted, it merely has to be replaced with a new piece. There is no ink reservoir, make-up or complicated parts that need regular replacement like most large character or CIJ printers.
