

AUTOMATIC BATCH CODER – JAPAN 160WG (4 Lines Japanese CIJ Model)

Japan 160WG is a high-speed Continuous Inkjet Batch Coder designed for accurate, low-cost and reliable printing up to 4 lines. Built with advanced Japanese pulse recovery technology, it ensures sharp printing with minimal fluid consumption and negligible maintenance.

Key Features:

- Prints up to 4 lines
- High-speed industrial printing
- IP55 protection rating
- Self head cleaning system for smooth start-up
- Low running & maintenance cost
- High contrast printing on dark surfaces
- Easy maintenance & production history access
- Operating Temp: 0°C to 50°C
- External communication supported

Performance:

- Up to 65 million characters per 500ml ink
- Wide range of inks & colours available
