

CAPPER – ELECTRIC MODEL MANUAL AKB-1

Electric manual type AKB-1 Capper specially designed for smooth and accurate capping of SDC bottles. This model is very easy to operate, requires minimum space, and can be hung from the ceiling, making it ideal for small to medium bottling units. Suitable for operators of any skill level.

Key Features:

- Electric manual capper for SDC bottles
- Smooth and consistent capping performance
- User-friendly operation – anyone can operate
- Requires very less floor space
- Can be ceiling-mounted (hanging type)
- Compact, lightweight and efficient design
- Reduces operator fatigue
- Low power consumption
- Easy maintenance and long service life

Applications:

SDC bottling units, soft drink plants, beverage filling lines and small-scale bottle capping operations.
