

EKTA AUTOMATIC MIXING CARBONATOR (SPECIALMODEL)

EKTA Carbonator is a necessary and a key machine for soft drink & soda especially CODD Goli / Goti Soda PET Bottle soda as well as glass bottle medium or large requirement.

Carbonator Mounted On SS Stand Supported With SS Control Panel With Auto & Manual Mode To Provide Sufficient Quantity To The Filler.

The machine uses the most advanced technology for static mixing (carbonize) with high efficiency, having larger area and low resistance.

The Carbonated water/ Soda and Soft Drink is of a superior quality with very low consumption of Carbon dioxide CO₂ gas and low electric consumption.

It uses stable function and low noise multi stage centrifugal pump to guarantee smooth machine operation. The machine adopts high accuracy proportional action needle valve which not only mixes accurately but also avoids cross flow. Its a heavy duty-built structure with all contact parts made of SS-304 and high-quality control panel.

It has auto level controlling and auto CO₂ pressure controlling system with Schneider electrical equipment and other parts to form complete automatic control system.
