

### THE EKTA CARBONATOR MEDIUM ZEN HEAVY DUTY

is an industrial-grade carbonation unit engineered for the efficient and consistent production of carbonated beverages such as soda, soft drinks, and sparkling water. Manufactured using premium SS304-grade stainless steel, this machine ensures hygienic operation, excellent corrosion resistance, and long-term durability for demanding industrial environments.

**Key features include** a high-performance CO<sub>2</sub> injection system combined with advanced inline mixing technology, allowing optimal gas absorption and uniform carbonation throughout the liquid. This ensures stable pressure control and consistent beverage quality with every batch. The heavy-duty construction and precision design make it highly reliable for continuous operation, while its adaptable structure allows seamless integration with other beverage production and bottling equipment.

This model is perfectly suited for medium to large-scale bottling operations, beverage processing plants, and commercial production lines where efficiency, consistent carbonation, and dependable performance are critical to maintaining high production standards.
