

### THE EKTA CARBONATOR INDUSTRIAL ZEN MODEL BIG

is a compact yet powerful carbonation unit engineered specifically for commercial soda and soft drink production. Built using high-grade, heavy-duty materials, this machine ensures superior durability, hygienic operation, and long service life even under continuous industrial working conditions.

**Key Features include** a robust 1.5 HP 3-piston motor that delivers high-speed and stable performance, enabling efficient and uniform CO<sub>2</sub> mixing for consistent beverage quality. The system operates within a CO<sub>2</sub> pressure range of 80–100 PSI, ensuring strong, crisp, and fully carbonated soda output suitable for premium beverage production. Its advanced internal design supports smooth gas dissolution, maintaining precise carbonation levels and reliable performance throughout prolonged usage.

This model is ideal for industrial bottling plants, soft drink manufacturing units, and large-scale beverage processing lines where high efficiency, consistent carbonation, and dependable operation are essential for professional production standards.
