

EKTA MULTIPURPOSE PROCESSING MACHINE – AKB-60

Ekta Juice Processing Machine AKB-60 is a heavy-duty multipurpose natural juice processing machine designed for efficient heating, mixing and processing of various fruit-based products. Built with food grade SS 304 construction, this machine ensures hygienic operation, durability and consistent output, making it ideal for juice manufacturers, beverage units and food processing industries.

Technical Specifications:

- Tank Volume: 28 Litres
- Motor: 1 HP Heavy Duty Motor
- Heater: 1 Heater – 3 KW
- Construction: Food Grade SS 304

Key Features:

- Multipurpose Processing Capability for a wide range of fruits and juice formulations
- Temperature Controller for precise heating control
- RPM Controller for adjustable stirring and processing speed
- Heavy Duty Stirrer System for uniform mixing and smooth processing
- Oil Separator Funnel with Stand for clean and efficient separation
- Hygienic GMP-oriented Design suitable for food processing applications
- Compact & User-Friendly Operation with low maintenance
