

ELECTRIC SUGAR BOILER TANK – SS (100 LTR)

Heavy-duty Electric Sugar Boiler Tank specially designed for efficient and uniform heating of sugar syrup and other liquid formulations. Manufactured with SS 304 double jacketed construction, this machine ensures hygienic operation, consistent heating and long service life. Ideal for food, beverage and pharmaceutical applications.

Technical Specifications:

- Tank Capacity: 100 Litres
- Tank Type: Double Jacketed SS 304
- Tank Weight: Approx. 100 Kg
- Outer Diameter (Breadth): 23 Inches
- Tank Length: 21 Inches
- Tank Height: 39 Inches

Key Features:

- Digital Control Panel for accurate temperature control and easy operation
- 3 KW Electric Heater (1 Pc) for fast and uniform heating
- Heating Sensor System for safe and controlled heating process
- Single Phase Motor (1440 RPM) for smooth and stable performance
- SS 304 Stirrer with Agitator Blade ensures uniform mixing without sedimentation
- GMP Model Design suitable for hygienic production environments
- All Control Parts Made of SS 304 for corrosion resistance and durability
- Equipped with Line Filter for electrical safety and consistent performance
