

Hand Operated - Plastic Bag Sealing Machine

This Machine is ideal for heat sealing plastic bags, multi layer pouches, laminated pouches etc. It can seal bags of various lengths and widths. It is very easy to use.

The bag with its contents is held between the sealing jaws and the handle pressed. An adjustable timer is provided to set the sealing time to suit the thickness of the bag being sealed. The machine heat seals the mouth of the bag. It can be used for packing food grains, dry fruits, granules, powders and all those things that need to be packed in plastic bags. It is an ideal machine for shops, bakeries, department stores, food packers and industries where packing is required.

Many models of the machine are available to suit various packing requirements. The main options available are:
