

## HOT AIR SHRINK PACKAGING GUN

A handheld device used to emit a controlled stream of hot air to shrink plastic film tightly over a bunch of bottles, ensuring secure and professional packaging. Ideal for bundle packing in beverage and FMCG industries.

### Key Features:

- Uniform hot air flow for perfect shrinking
- Suitable for shrink wrapping bottle bundles
- Easy to operate and portable
- Durable blower system
- Helps achieve tight & neat packaging
- Must be switched off between usage to prevent blower damage
- Low maintenance & reliable performance

Perfect for manual shrink packaging applications where speed and flexibility are required
