

This RO plant has a capacity of 500 litres per hour and is specially designed for drinking water, packaged drinking water, industrial and commercial applications.

Technical Specifications:

Capacity: 500 Litre Per Hour
Raw Water Pump: CRI (High Efficiency) Multigrade /
Carbon Filter: 1248/1054 FRP
Jumbo Filter: 2 PP Cartridge Filters
High Pressure Pump (HPP): CRI 2/11 Dosing Pump /
Antiscalant: 5 Litres Capacity
IPS (Inlet Pressure Switch): Foley
Control Panel: Astral
Pipeline: UPVC (High Quality, Long Lasting)

Key Features:

- High-quality raw water pump for durability
- Dual-stage jumbo filters for better purification
- Strong UPVC pipeline for leak-free performance
- User-friendly Astral control panel
- Compact design, easy installation & low maintenance

R. O. 500 LTR

This machine removes impurities, bacteria, salts, and heavy metals to provide clean, safe, and healthy drinking water.
