

**MODIYO®**  
THINK INNOVATIVE

The 1000 LPH RO Plant is a heavy-duty system designed for large-scale industrial and commercial applications, ensuring high-quality purified water with reliable performance.

**Technical Specifications:**

Capacity: 1000 Litre Per Hour  
Membrane: Dow RO Membrane  
Pumps: CRI / Lubi / Mountain  
Skid: SS Skid (Stainless Steel)  
Vessel: FRP Vessel

**Key Features:**

- High-capacity water purification for industrial use
- Durable stainless steel skid for long-lasting strength
- Trusted Dow RO membrane for superior filtration
- FRP vessels for efficient treatment and durability
- Easy installation and low maintenance

This plant is best suited for industries, hotels, schools, packaged water units, and commercial water supply projects.
