

RINSER 2 HEAD REGULAR

The Rinser 2 Head Regular is a compact and efficient PET bottle rinsing machine designed for thorough internal cleaning before filling. Built with a sturdy Stainless Steel (SS) body and stand, this machine ensures durability, hygiene, and long-lasting performance. It is ideal for small to medium-scale beverage and water bottling units where consistent and effective bottle rinsing is essential.

This machine is equipped with two rinsing heads powered by a high-pressure pump, allowing simultaneous cleaning of two PET bottles. The strong water pressure removes dust, particles, and contaminants from inside the bottles, ensuring safe and hygienic filling. Its user-friendly design allows easy operation with minimal maintenance, making it a reliable choice for continuous production environments.

Key Features:

- 2 Head rinsing system for faster operation
- High pressure pump for deep and effective cleaning
- Fully SS stand & body for corrosion resistance and hygiene
- Suitable for PET bottles
- Compact and space-saving design
- Easy operation and low maintenance
- Ensures superior bottle cleanliness before filling
- Ideal for beverage, water, and juice processing units

This rinser is a perfect solution for improving production efficiency while maintaining high-quality hygiene standards in your bottling line.
