

### **EKTA SODA MAKER PREMIUM (FOR GLASS BOTTLE)**

This premium SS soda maker is a heavy-duty manual machine specially designed for filling CO<sub>2</sub> gas in glass bottles to produce fresh soda and soft drinks. It is ideal for hotels, juice centres, cafes, and mobile vending operations.

The machine is equipped with a strong built-in storage tank that allows CO<sub>2</sub> gas to be stored, making it convenient to carry and use without always depending on an external CO<sub>2</sub> cylinder. The top-mounted filler ensures smooth and safe gas filling, while the precision pressure gauge clearly displays the CO<sub>2</sub> pressure level, indicating the safe operating range up to the red line.

#### **Key Features:**

- Suitable for glass bottle soda filling
- Manual operation – no electricity required
- High-quality stainless steel body
- Built-in CO<sub>2</sub> storage tank for portability
- Accurate pressure gauge for safety control
- Easy to operate & maintain
- Durable, corrosion-resistant & long-lasting performance
- Perfect for consistent carbonation and professional soda serving.
