

SS SODA MAKER (FOR PET BOTTLE)

This SS Soda Maker is a premium manual machine specially designed for filling CO₂ gas into PET bottles to produce fresh soda and soft drinks. It is ideal for juice centres, small beverage units, food courts, and mobile vendors.

The machine is equipped with a sturdy built-in storage tank that allows CO₂ gas to be stored, making it convenient to carry and operate even without a connected CO₂ cylinder. The filler is mounted on top of the tank for smooth and efficient gas filling, while the integrated pressure gauge clearly shows the CO₂ pressure level and safe operating range (up to the red line).

Manufactured from 100% food-grade stainless steel, it ensures hygienic operation, corrosion resistance, and long-lasting performance. The CO₂ gas cylinder can be provided as per customer requirement (on customer's scope).

Key Features:

- Suitable for PET bottles only
- Manual operation – no electricity required
- 100% food grade stainless steel body
- Built-in CO₂ storage tank for easy portability
- Accurate pressure gauge for safe usage
- Strong, durable & rust-resistant construction
- Easy to operate & low maintenance
- Ideal for commercial soda and soft drink preparation

A reliable and practical solution for consistent soda quality with professional performance.
