

Capabilities Statement | 2025

Better Roofers is a small business with over 18 years in business, led by professionals with over 30 years of roofing industry experience. We provide full-service roofing, siding, and remediation solutions for federal and private sector clients. Our expertise includes the installation and repair of complete roofing systems such as TPO, EPDM, PVC, metal, and asphalt roofing. We have substantial experience in the application of liquid-applied coatings and work with a wide range of roofing types, environments, and system requirements. Our capabilities also include lightning protection systems. Better Roofers has successfully delivered complex, large-scale projects that require technical accuracy, careful coordination, and adherence to stringent safety and quality standards. Our workforce consists of highly qualified personnel, supported by a network of vetted subcontractors. We hold manufacturer certifications and training with Versico, Holcim Elevate, CertainTeed, American WeatherStar, Harger Lightning Protection, and others to ensure quality and reliability.

Recent Work — FAA Tampa Airport Radar Tower Coating and Repairs — Tampa, Florida

For the Federal Aviation Administration, we applied a protective roof coating system on an active radar tower at Tampa Airport. The project included precise coating application while maintaining operational safety on the live site. In addition, we performed drywall repairs, interior painting, and remediation to restore affected interior areas. The work was completed efficiently with minimal disruption to FAA operations.
