PROJECTS

Ministry of Defense (Indian Air Force)

- e-MMS (Electronic Maintenance Management System) is one of the largest Maintenance Repair Overhaul (MRO) IT implementations in the world, that helps the client to get rid of paperwork and heavy logbooks. It transforms the paper-based legacy maintenance system of the client to an online system. The solution provides real-time pan-organization visibility, standardization, and validation of maintenance processes, online document search, automation of workflows leading to paperless work, biometric time stamping for all work processes

Toronto Transit Commission

- Toronto Transit Commission (TTC) is the public transportation provider for Toronto, serving approximately 1.7 million daily commuters. It operates various services, including subways, streetcars, and buses, with real-time data available for its 16 streetcar lines and 199 bus lines.
