

FENG SHUI YOUR WEALTH ZONE

How to Find Your Money Corner

To find the wealth area of your entire home, stand at the formal front door of your house facing in, and locate the far left corner.

****Tip****

To make this simpler, you can also work with the wealth area of just your bedroom or office. In this case, you would stand in the main door of the bedroom or office looking in. The far left area is the wealth corner of your bedroom or office.

Decorate With Purple

Colour is important in feng shui and purple is a hue associated with the wealth area, so placing something purple here can activate wealth and abundance. This could be a piece of artwork, a throw pillow, a planter, or any other item that you're attracted to.

Here are some tips to help you generate abundance using your money area

- Leave something purple on this area to signify abundance. If purple doesn't match your decor, it can even be a piece of tape inside a drawer or a purple dot drawn underneath a shelf. Feel free to get creative!
- Create a money bowl
- Place plants in this area to signify prosperity and luck.
- Keep this space de-cluttered and organized
- Keep this space clean
- if this room goes unused, the energy will become stagnant around your wealth. Find ways to activate this room and make it more usable and loved to increase abundance
- If this room is a bathroom, it is especially important to keep the lid of your toilet closed. Actually, you should do this with all toilets in your house because toilets are known in the Feng Shui world to drain positive energy. So, if your back left room is a bathroom, be especially careful to leave the toilet lid down to prevent a literal flushing of your money energy.
