

SUOMI ADVISORY GROUP

SUOMI ADVISORY GROUP

Global Carbon Markets. **At Your Service.**

Welcome to Suomi Advisory Group Inc., your premier partner in navigating the complexities of global carbon markets. With innovative solutions and unparalleled expertise, we empower organizations to achieve sustainable impact and financial success in a low-carbon economy.

ABOUT US

Pioneering Carbon-As-A-Service (CaaSTM)

Headquartered in West Vancouver, Canada, Suomi Advisory Group is a global leader in voluntary and compliance carbon markets. Our mission is to transform decarbonization opportunities into sustainable revenue streams, aligning with net-zero goals. With a commitment to innovation, integrity, and professionalism, we deliver tailored solutions for project developers, investors, and credit buyers worldwide.

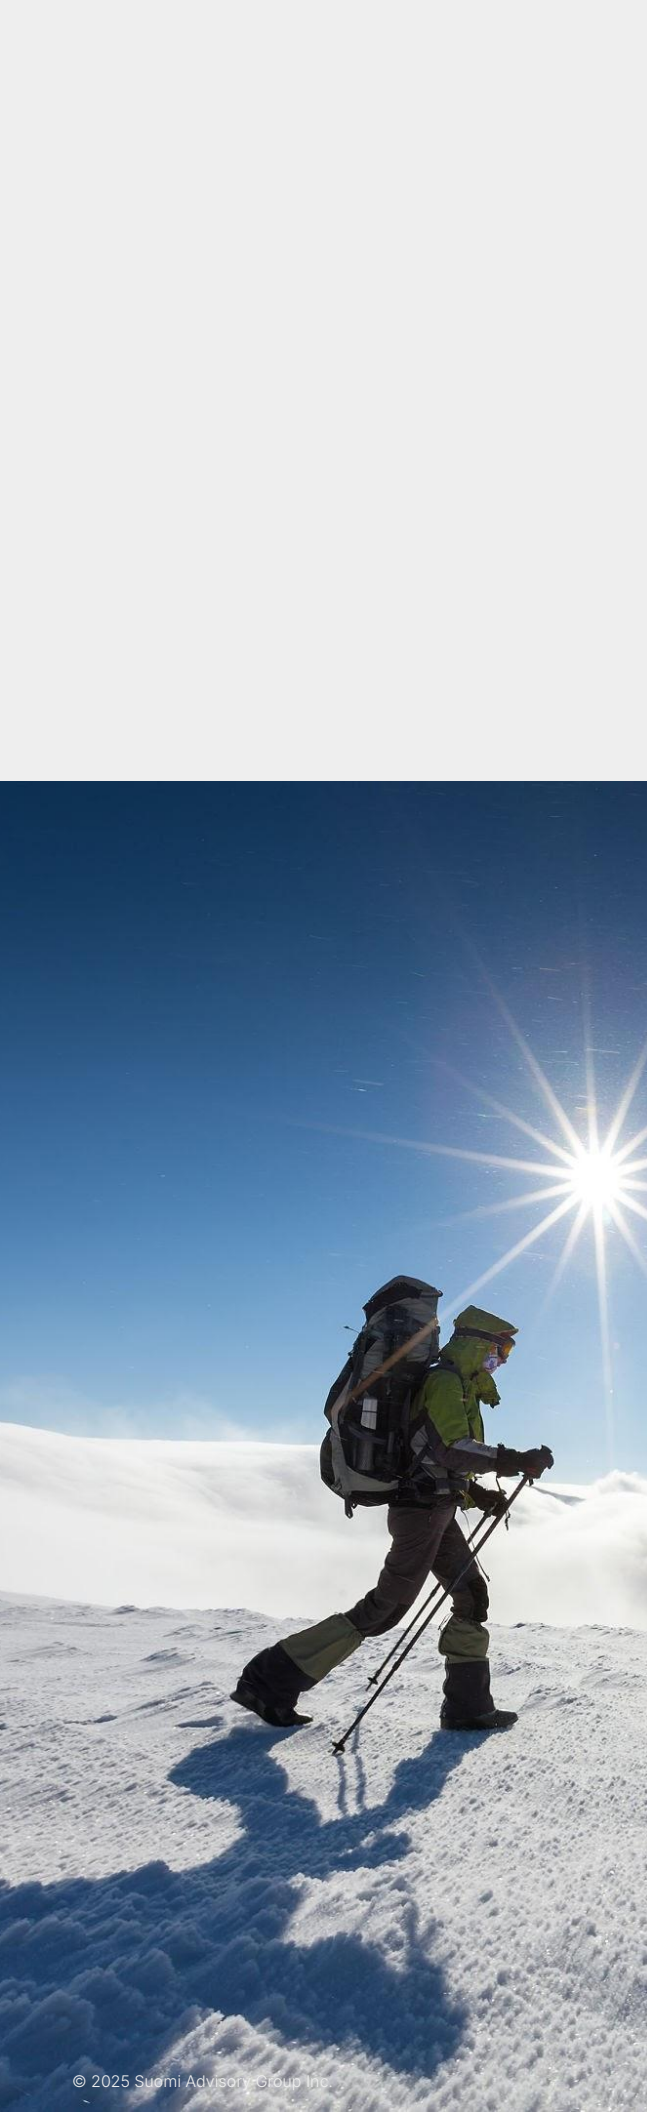

OUR LEADERSHIP

Led by **Pioneering Expertise**

Founded by David Oliver, a pioneer with nearly a decade of experience in carbon markets, Suomi drives transformative initiatives in environmental commodities. David's notable achievements include developing the world's largest offset program by geographic footprint across the USA and Canada and securing the first USPTO-issued patent for a credit-generation process. His leadership ensures innovative, high-value solutions for our clients.

DAVID OLIVER, M.Eng.
Founder and President

OUR VALUES

Guided by **Core Principles**

Integrity

Upholding the highest ethical standards in all engagements.

Confidentiality

Safeguarding client information with utmost discretion.

Professionalism

Delivering services with precision and excellence.

Innovation

Pioneering new approaches to carbon markets and sustainability.

HOW WE WORK

Tailored Engagement Models

Suomi offers two primary engagement models to meet client needs.

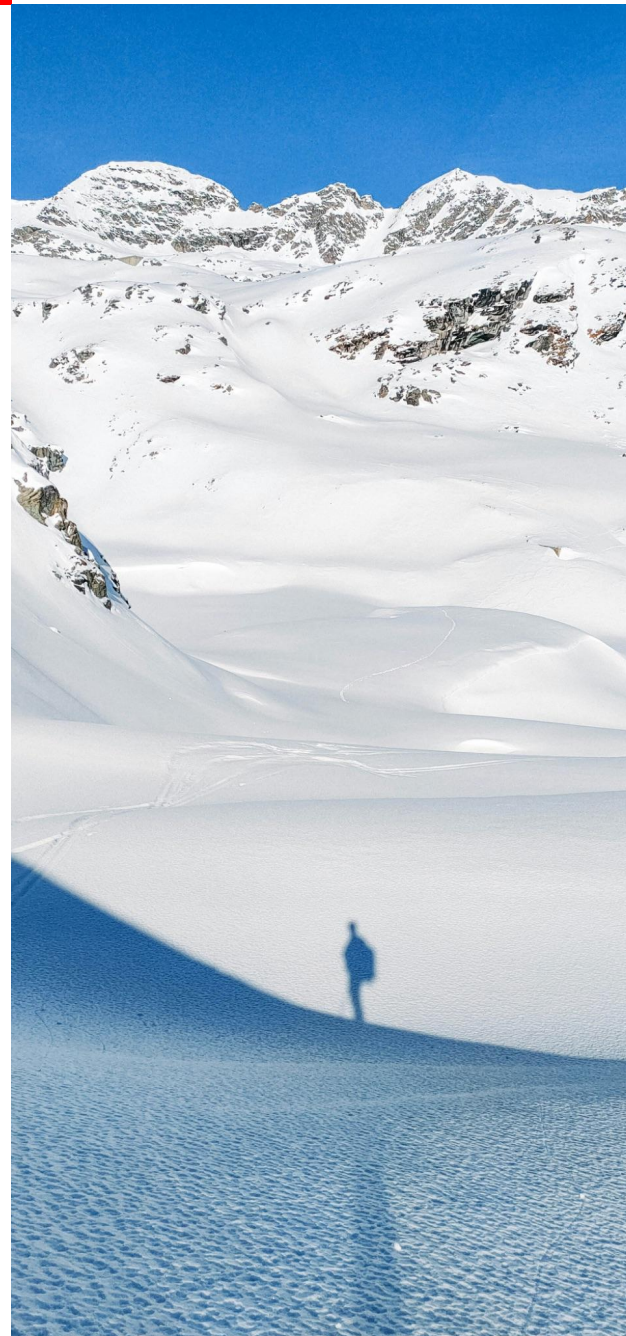

Traditional Consulting

Targeted expertise for specific projects, such as feasibility studies and due diligence, delivering actionable insights.

Retainer-Based Partnerships

Acting as an integral part of your team, leading carbon-related responsibilities, including methodology development and digital MRV systems.

OUR SERVICES

Comprehensive Carbon Market Solutions

We provide comprehensive services to support project developers, investors, and credit buyers in navigating carbon markets.

01. For Project Developers

From Concept to Commercialization

Feasibility Studies and Assessments

Project Architecture and Development

Digital MRV Development

Carbon IP Development

Project Financing & Commercialization

02. For Investors and Credit Buyers

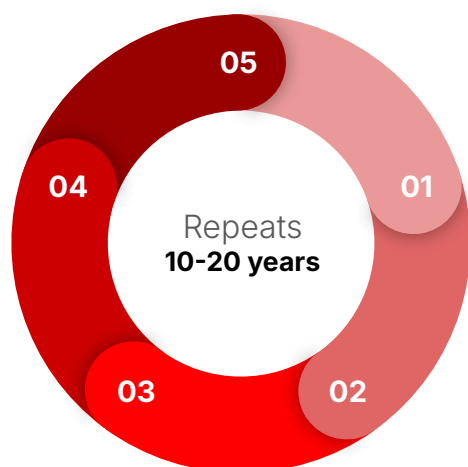

Credit Due Diligence Services

OUR SERVICES / 01

Innovative Carbon Offset Programs

01	Implement activity	Participant
02	Report data	Participant
03	Verify data	CME
04	Issue credits	Registry
05	Credit sale & Revshare	CME

In addition to the development of traditional client-specific carbon projects, Suomi provides innovative carbon offset solutions through a unique Program of Activities (PoA) approach, designed to streamline the development and management of high-impact offset programs that covers complete regions and industries reducing production costs while increasing credit value and credibility.

- **Standardized Program Agreement**
A single, unified agreement to efficiently enroll all participants.
- **Favorable Revenue-Sharing Model**
Typically a 75%/25% split between participants and the program administrator (CME).
- **Predefined Mitigation Activities**
A curated list of eligible activities for credit generation, aligned with recognized methodologies.
- **Standardized Annual Cycles**
Consistent schedules for data reporting, verification, credit issuance, and revenue distribution.
- **Unified Digital MRV System**
A user-friendly platform for participant enrollment, data reporting, emission reduction quantification, and transparent, efficient, and accurate reporting.

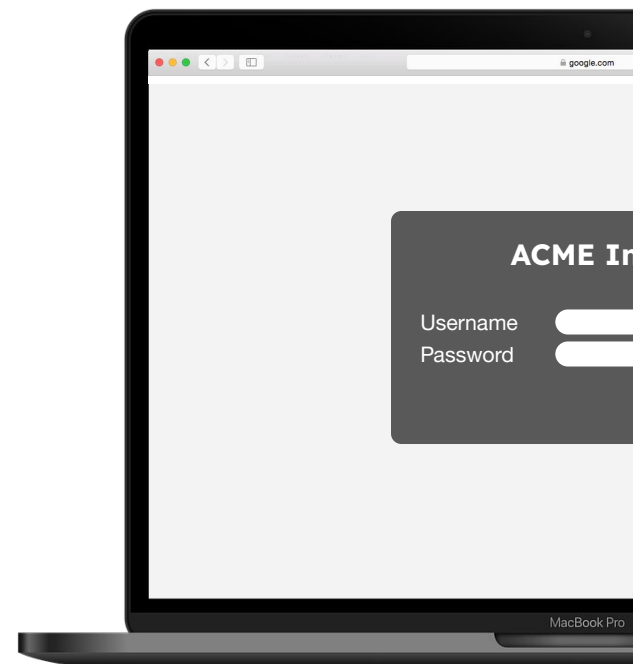

Advanced Digital MRV Solutions

Digital Measurement, Reporting and Verification (dMRV) systems are the cornerstone of credible and transparent carbon markets.

Suomi develops advanced dMRV systems that serve both client-led offset projects and Suomi's offset programs.

- **Web-Based Secure Access**
Streamlined sign-up and sign-in processes for secure user access.
- **Fully Digital Onboarding**
Efficient, paperless onboarding for seamless project integration.
- **Standards-Compliant Ownership Transfer**
Ensures compliant transfer of environmental attributes.
- **Standardized Data Inputs**
Utilizes standard program templates or Restful APIs for consistent project activity reporting for all participants.
- **Automated Quantification**
Automatically quantifies baseline and project emissions, and emission reductions using recognized methodologies.
- **Automated VVB Reporting**
Generates reports for Validation/Verification Bodies (VVBs) to streamline compliance.
- **Independently Validated dMRV System**
Reduces annual verification complexities and costs through a validated platform.

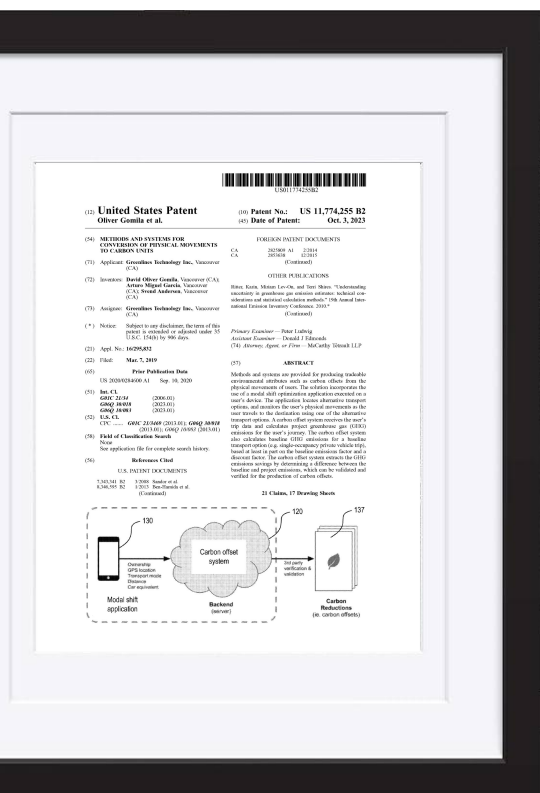

OUR SERVICES / 03

Pioneering Carbon IP Development

Suomi designs tailored carbon credit generation processes, creating scalable IP that generates additional revenue through licensing and white labeling. We provide comprehensive patent support, collaborating with expert legal partners to secure patents in multiple jurisdictions, backed by Mr. Oliver's leading carbon-IP expertise.

- **Tailored IP Solutions**
Suomi designs customized carbon credit generation processes aligned with your business, ensuring scalable and impactful IP development.
- **Additional Revenue Generation**
Developing and protecting IP enables your business to create additional revenue streams through licensing royalties, white labeling, and other monetization strategies.
- **Comprehensive Patent Support**
Suomi produces all necessary materials, including patent specifications and diagrams, to support robust patent applications.
- **Expert Legal Partnerships**
Collaborates with experienced patent attorneys to maximize the success of patent applications in the US, EU, and other jurisdictions.
- **Expert Leadership**
David Oliver has pioneered the first-ever USPTO-issued patent for a carbon credit-generation process, with multiple patents pending, showcasing his expertise in innovative Carbon IP.

GLOBAL REACH, LOCAL IMPACT

Serving Clients Worldwide

With clients around the world, we bring a global perspective to local challenges, ensuring solutions are both scalable and context-specific.

Serving Clients Across The World

United States

Canada

United Kingdom

Belgium

Senegal

Kenya

Mexico

Experience Across Industries

Electrification of Transport

Low-carbon Urban Mobility

Building Energy Efficiency

Renewable Energy Generation

Maritime Industry

Road Construction

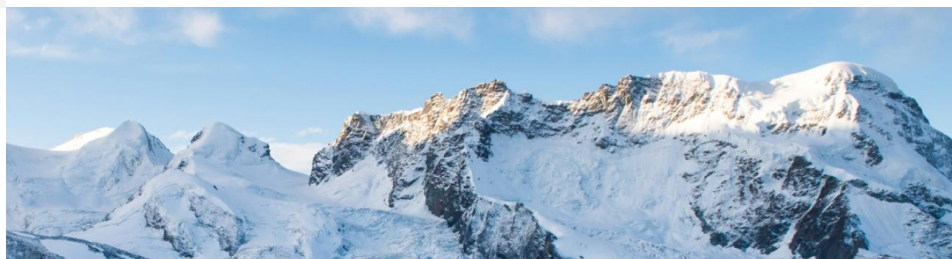

Potent Gases in Heavy Industries
