OBJECTIVE

A company runs smoothly only if they have a set of their objectives to follow in front of them. Below are our objectives

- Our sole aim is to lead in the transport and travel industry.
- We ensure that we personally consult with our each and every client individually and provide them with innovative value-added solutions.
- Taking care of our employees is also our main objective, and hence we provide a pick and drop service to our employees for 2 main reasons.
- Our employees don't have to face any challenges while travelling as their safety is our concern.
- It also helps to reduce their travelling cost and ease their journey to the office.

From employees to clients to employees everyone gets the best of what we can offer treatment.

ABOUT US

In 2014, **Kalim Shaikh** established the stone of **Transcend Fleet Travels Pvt. Ltd.** and has dedicatedly worked hard with great passion, enthusiasm, and keen knowledge for the company every day to maintain a long-standing reputation of excellence in the city of Pune and beyond.

Founded in 2014, Transcend Fleet Travels Pvt. Ltd. has quickly emerged as the leading Industry of Ahmedabad and has become **Pune's Most Trusted Taxi Service Company**. Moving forward and emerging better, Modheshwari Travels, now known as "**Transcend Fleet Travels Pvt. Ltd.**," always offers clean vehicles and **A-class** customer service that makes them far exceed their competition.

With thoughtful attention to detail, Transcend Fleet Travels promises incompatible performance that is second to none and service that is noticeably different. Through "Transcend Fleet Travels" services, our clients save not only their hard-earned money but also their precious time. Thus one can surely feel the difference between being part of the **Best Car Rental Service In Pune, Mumbai, Ahmedabad, Vadodara, Surat, Rajkot, Jamnagar, Indore, Hyderabad & Bangalore.**

OUR AIM

Team **Transcend Fleet Travels** consists of people who believe in working hard and smartly.

- We aim to satisfy our clients by providing them with an effective and efficient transport system.

We focus on optimum utilization of the resources, that is, the vehicles we have comprise of

- Better routing algorithms for trip management
- Better control and management of daily trips.
- To completely eliminate the manual process of trip sheet generation.
- To introduce the required transparency and improve efficiency.
- Improve operational procedures.
- Assure clear communication.
- Reduce operational time of key operational personnel to customer needs.

OPERATIONAL PROCESS/CONTROL :::

We follow some simple steps to ensure appropriate services.

STEP 1

Our vehicles report at the start point 15 minutes in advance on the route planned by the routers.

STEP 2

Supervisors follow up with the drivers and the staff for proper pick-ups.

STEP 3

Supervisors prepare the rosters and allocate the vehicles as per the requirement of pick-up and drops and instructed by the infra department.

STEP 4

Driver reports over the radio as soon as they reach the starting point.

STEP 5

Each employee is intimated well in advance of the pick-up time.

STEP 6

Each vehicle will carry a logbook & attendance sheet to keep a record of kilometers and details of employees traveled.

STEP 7

A vehicle waits for a maximum of minutes or as specified by the intra-department at each pick-up point.

STEP 8

In case of non-availability of staff, the driver reports to the tracker on the radio and proceeds further.

STEP 9

At the destination, the logbooks and the attendance sheets are counter-signed by trackers, and thus the data is captured.

STEP 10

If any vehicle is stuck in traffic or a road jam due to an accident, information will be immediately intimated to the infra department.

STEP 11

The report will be generated and submitted to the infra department as per the requirement. We consist of a squad of 100 people who have located themselves at different locations to check if the vehicle is running over speed and unknown persons are prohibited in the vehicle to avoid any unlawful incident.

We have a dedicated operations team to handle the operations and requirements of our clients. The operational team consists of a few people who coordinate with each other to ensure safe travel the whole day! The team comprises an Operation Manager, an Assistant Manager, a Project In-charge, Transport Co-ordinators, Special Guards and Trackers.

The Operation Manager is the person who concentrates on daily operation activities and also coordinates with the senior admin staff for the implementation of new policies. The person on the chair is solely answerable for all the operational procedures.

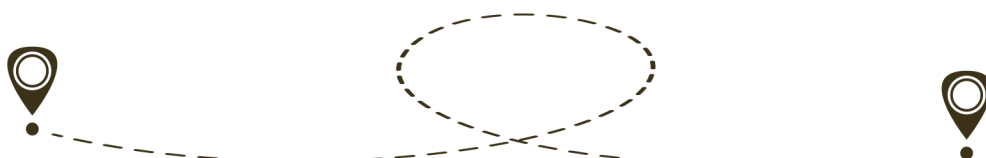

The Assistant Manager takes care of the policies on a daily basis. He coordinates with the transport team of the company for any assistance. He also makes sure that the procedures and planning given by the admin are implemented and executed properly by the transport team.

The Project In-charge is the person who monitors and takes care of the daily activities of the transport system. He takes care of roistering, routing, allocation of vehicles, dry runs, and other activities.

The transport team leader makes sure that the vehicles are reached at the pickup point well in advance and he also makes sure that the agent should get all the relative information regarding their pickup vehicles. He is also responsible for observing that the vehicle or the driver is going along with the guard while going to pick up a lady to ensure extra safety.

The Transport coordinators' work is to ensure the vehicle reaches the destination properly. He also has to make sure that the vehicles should reach the office as per the instructions given by the infra or admin department.

The Trackers keep close track of all the movements. The trackers help us with the data like vehicle reporting time and the number of employees seated at the pickup or dropped at the drop location.
