iDeal OS Activation Tool V1.1

1. Introduction

The iDeal OS Activation Tool is a simple utility that allows you to upgrade your free Emerald Edition and unlock the full potential of the Diamond Edition with a single click.
There is no need to download or reinstall anything.
Anyone who supports our project with a small donation will receive a unique license key to enjoy all the professional tools perfectly integrated into your desktop.

A comparison table of the installed applications can be found here.

2. Prerequisites for activation

Before obtaining a license for the Diamond Edition of iDeal OS, please ensure that your hardware meets the necessary requirements.

While the free Emerald Edition can run smoothly on a quad-core CPU and 8 GB of RAM, for the Diamond Edition we recommend a six- or eight-core CPU, 16 GB of RAM or more, a fast SSD or NVMe drive, and a graphics card such as an NVIDIA GTX 1650 or better.

A powerful graphics card is essential for video editing, especially for 4K projects.
The more powerful the card, the more complex the projects you can handle.
Also, make sure you have the latest drivers installed.

3. FAQ

You might ask, 'Isn't Linux and the installed software supposed to be free?'
Yes, and they always will be.
However, you are paying for development, maintenance, packaging, and countless hours of real-world testing on multiple hardware configurations.
In return for your support, you will receive a curated selection of powerful tools designed to boost your productivity. These tools are seamlessly integrated into your desktop, saving you hours of DIY work.
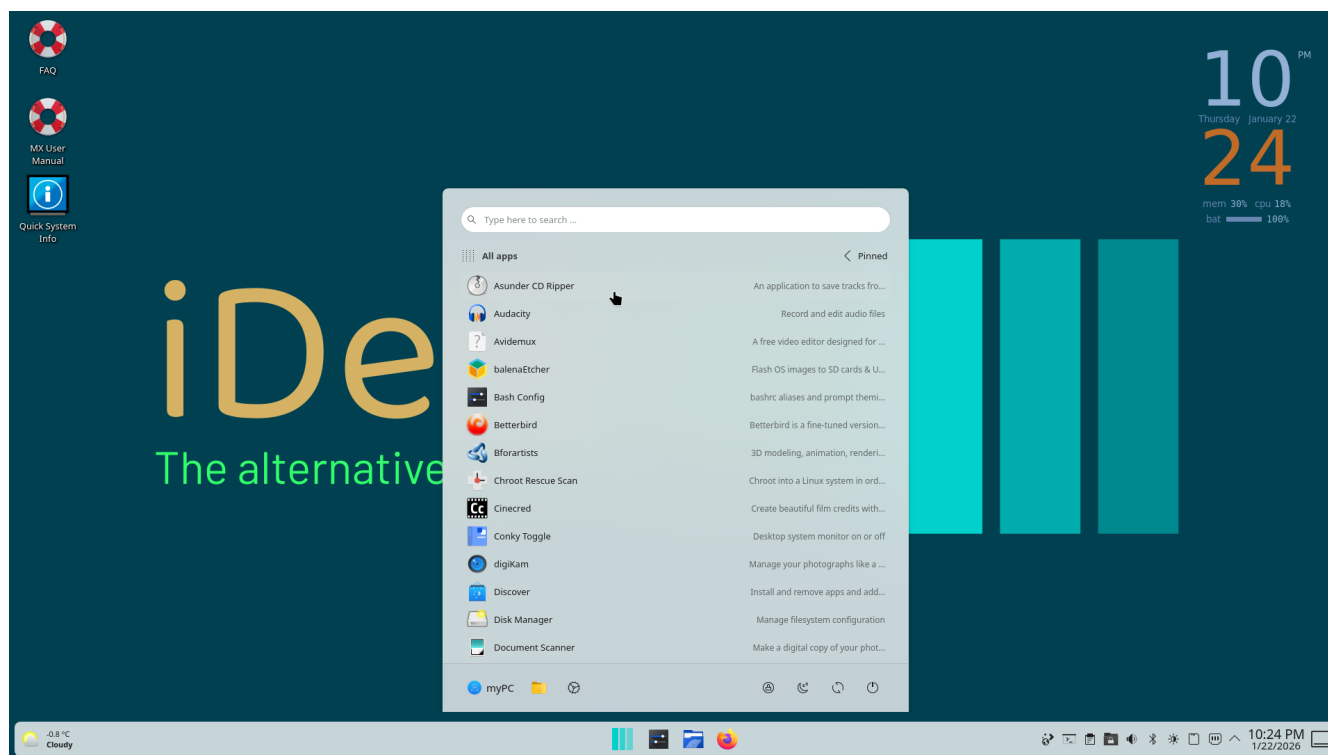

4. Extra Diamond Edition bonus

As an additional gift to our supporters, two new global KDE Plasma themes resembling Windows 11 will be available in the system settings.

Diamond Dark

Diamond Light

5. Get your license!

Follow [this link](#) to donate to our project and receive your Diamond Edition license key.
This code is unique and valid for a lifetime, so please store it carefully.

After completing the payment process, please email us your transaction details at
diamond@ideal-os.xyz

Rest assured that you will receive your license key within 24 hours.

6. Thank you!

Thank you for donating to our project, your support is much appreciated!

Start the iDeal OS Activation Tool from the 'Application Menu' > 'System'.

Copy and paste your unique license key, then click '**Activate iDeal OS Diamond Edition**'
and confirm with your password.

The activation tool will perform a series of tasks in a terminal window.
Please wait until the process is complete.

To enjoy all the changes that have been applied, please reboot and log back in.

If you require further assistance, please email us at support@ideal-os.xyz
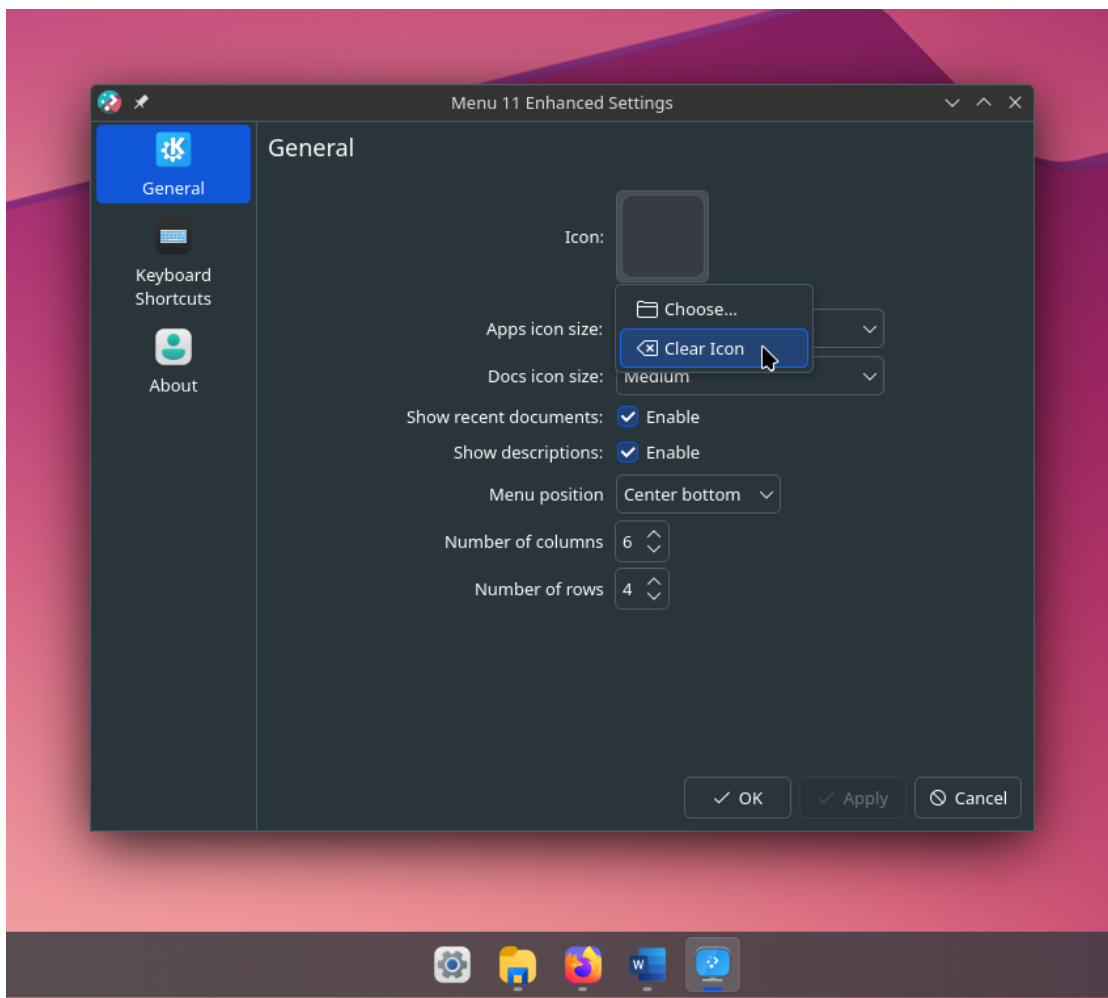

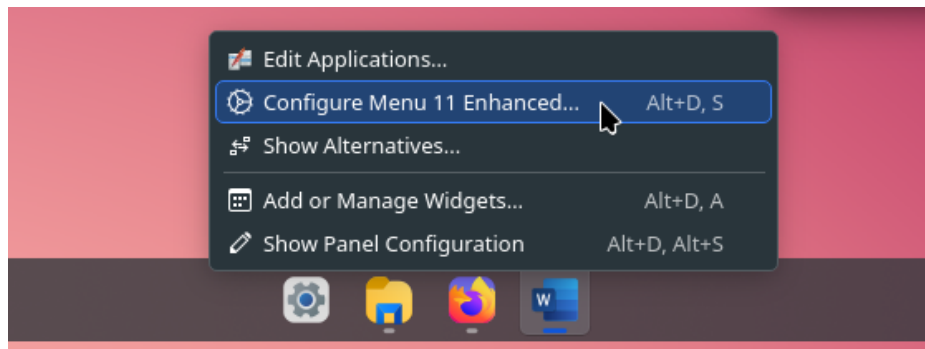

7. Known bug (under investigation)

On rare occasions, the icon for the Start Menu does not appear when switching to the new Windows 11-style themes.

If this happens on your PC, the quick fix is:
1) right-click on the missing icon half a centimeter to the left of the last menu bar icon
2) select 'Configure Menu 11 Enhanced'
3) click on the missing icon and select 'Clear Icon'
4) apply the changes and confirm with OK

The original iDeal OS Diamond Edition icon will appear and will remain in place.

8. Privacy Policy

We will only use your email address or any other personal details you may provide to complete the license transaction.
We will not retain your email address or send you advertisements.
The iDeal OS Activation Tool does not collect any data about your hardware.
