LARGE PET SOFA

PILLOW FILLING

Styrofoam filling: the filling consisting of balls allows the pillow to perfectly adapt to the shape of our dog's body. Moreover, this durable material does not collapse and prevents the formation of lumps and maintains the same volume for a very long time. It is also perfect for dogs struggling with allergies because it is completely hypoallergenic.

"French fry" filling - it is made of the highest quality polyurethane foam, which guarantees elasticity and comfort.

The foam is cut into small pieces called frits, it is used as a filling for furniture and bedding cushions, so it will certainly be appreciated by our pet.

WHAT IS THE SOFA MADE OF:

It is important what we make the bed for your pet from.

The materials from which our sofas are made are the highest quality materials.

For production, we use exactly the same components that are used to produce furniture for people. All materials have appropriate certificates recognized in the EU.

OUR SOFAS CAN BE COVERED WITH:

- CERATO leather - it is the highest quality material while maintaining the natural character of leather: elegant, soft, warm to the touch, perfectly matching the elegant interior.
- Our selection of fabrics - plush fabric, extremely resistant to abrasion or scratching; does not fade and does not pill, soft - extremely pleasant to the touch.
- VIENNA eco-leather - also known as derma, which perfectly imitates natural leather; water resistant, non-fading, durable and very easy to clean.
