

GEOHERMAL ENERGY

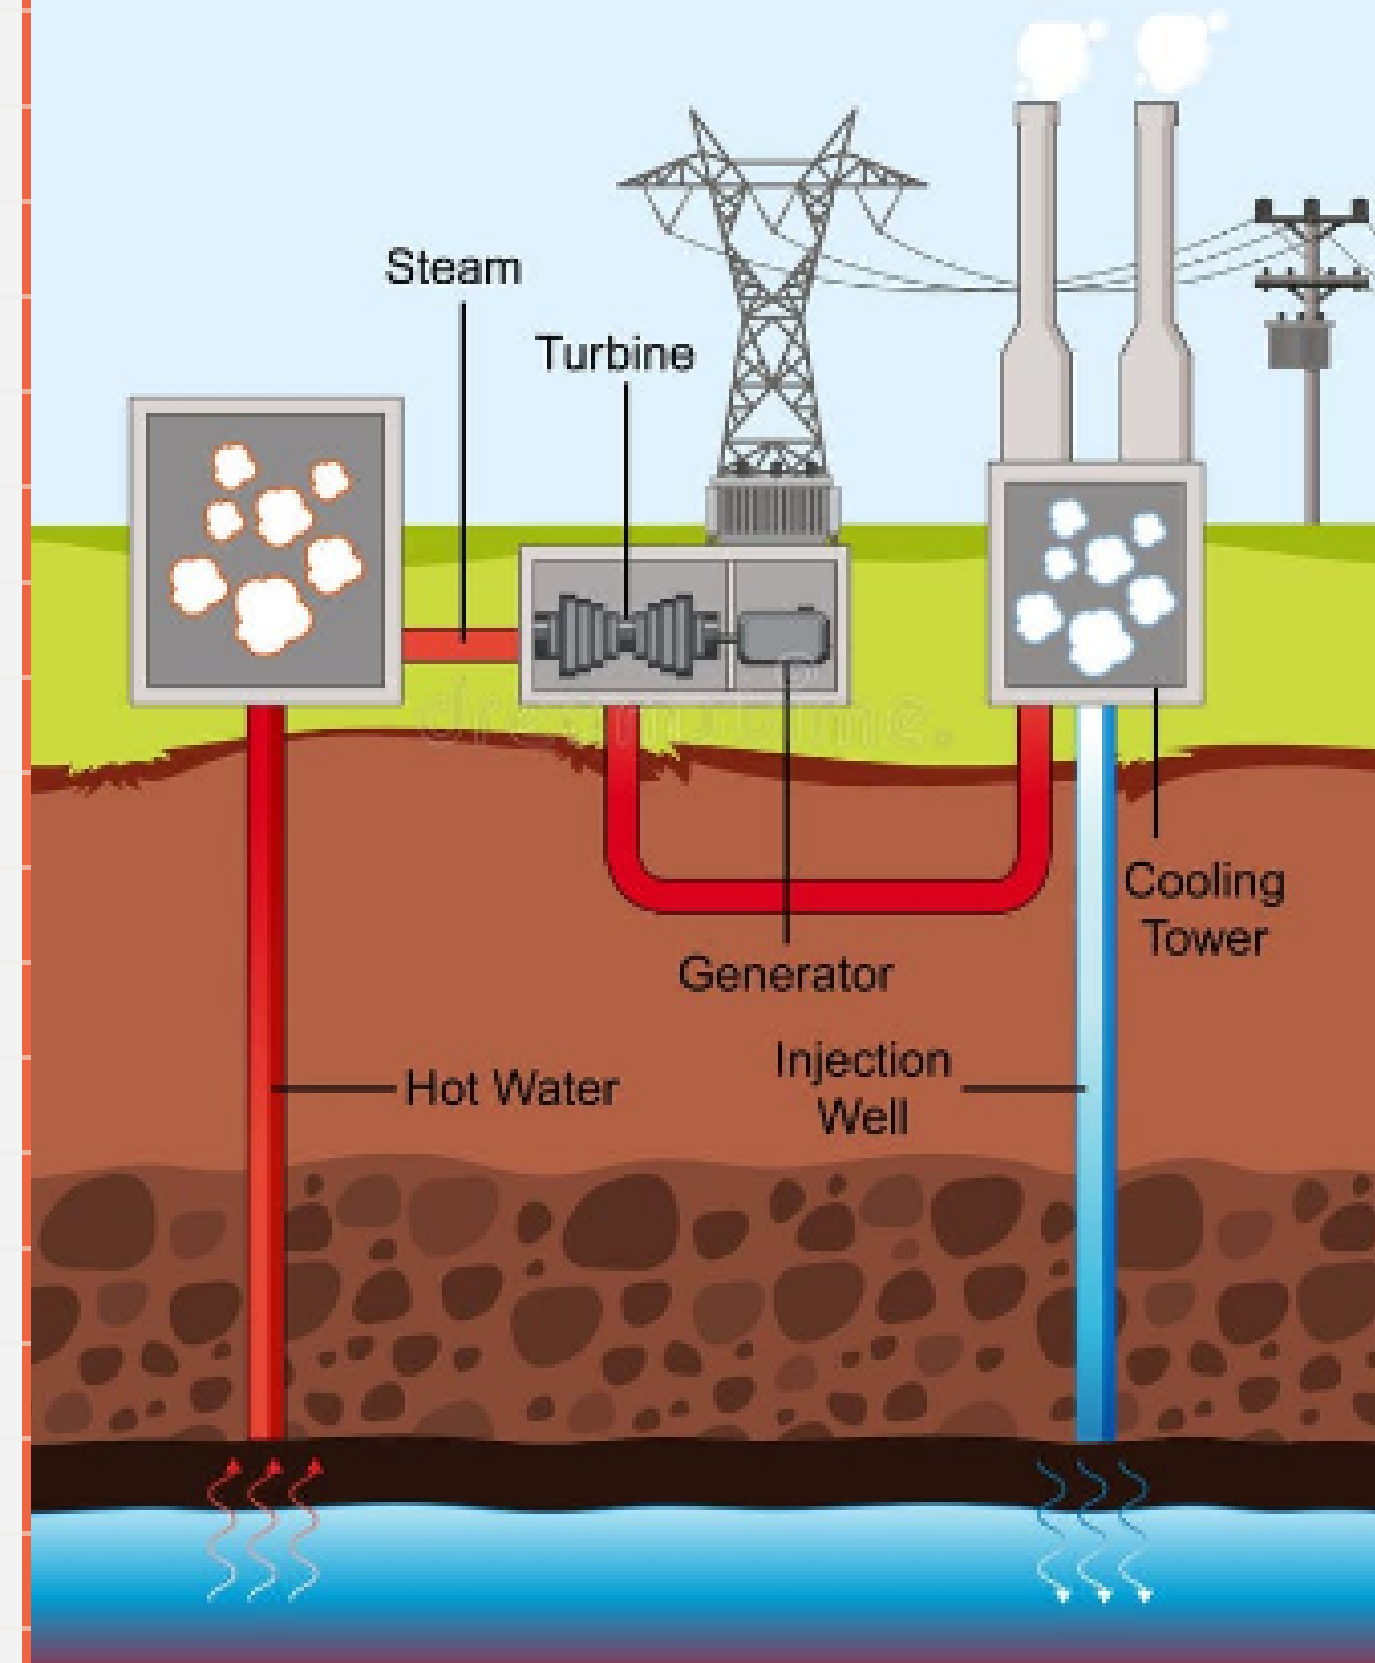

Geothermal electricity

Geothermal energie is made with earth's warmth. Water goes under earth, it heat by earth and become steam and push a piston which turn a turbin. Then it goes to a generator and into th electrical gird.

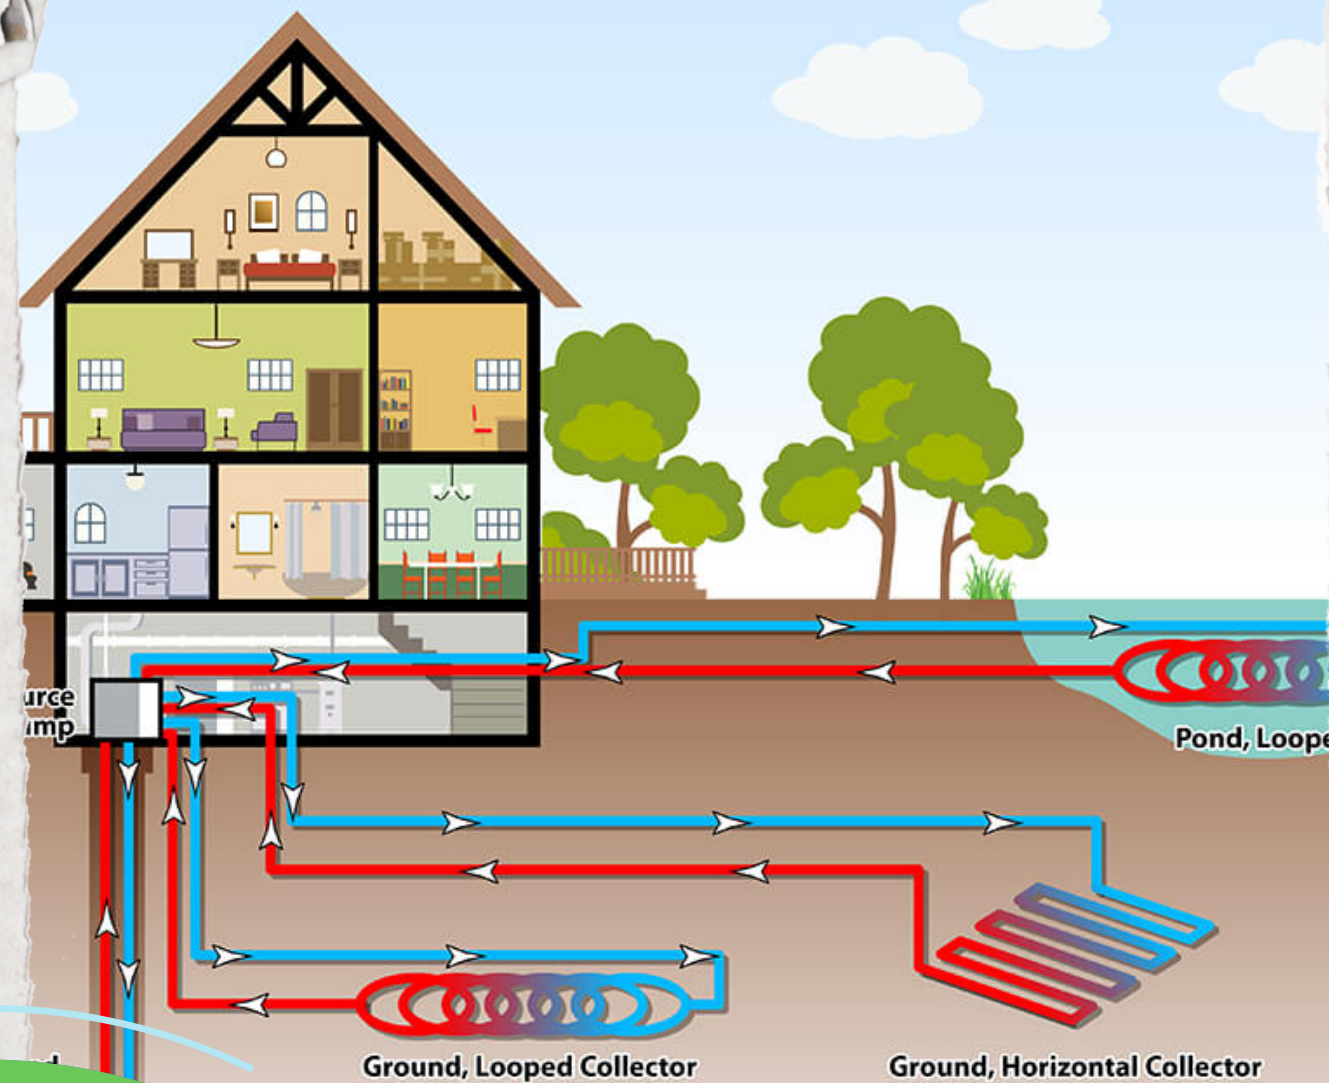

Geothermal Power

geothermal heating

Warmth of earth can be use to directly heat houses or building like a normal heating. Water goes into earth, is heating by earth and heath all the building.

For what uses?

electricity

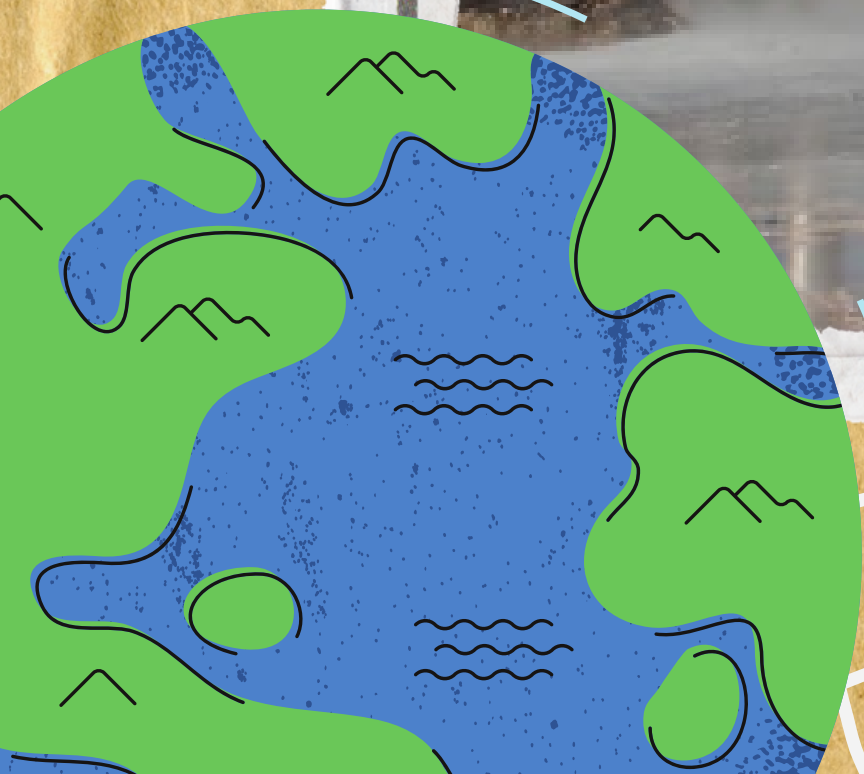

Recycling

Reduce the
pollution

Benefits

- > renewable resources
- > reduces fossil fuel consumption and non-renewable resources
- > doesn't produce a lot of waste

Who are the actors?

--> Use by

+ of 20 countrys:

The United States, Japan, Italy,
New Zealand, Iceland, France, Hungary
Terawatt-hour
