Enterprise Profile

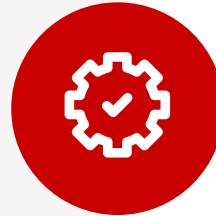

Basic information of the enterprise

Enterprise Profile

Basic information of the enterprise

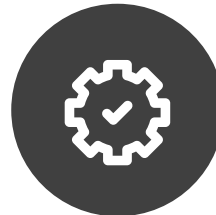

Quality suppliers and exporters

Eco Green Energy wind power partner is one of the leading medium and small wind turbine supplier and exporter in China.

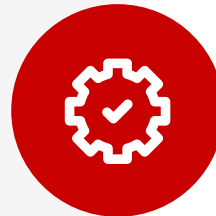

More than 10 years of rich experience

They had been more than 10 years experience for medium and small wind turbine.

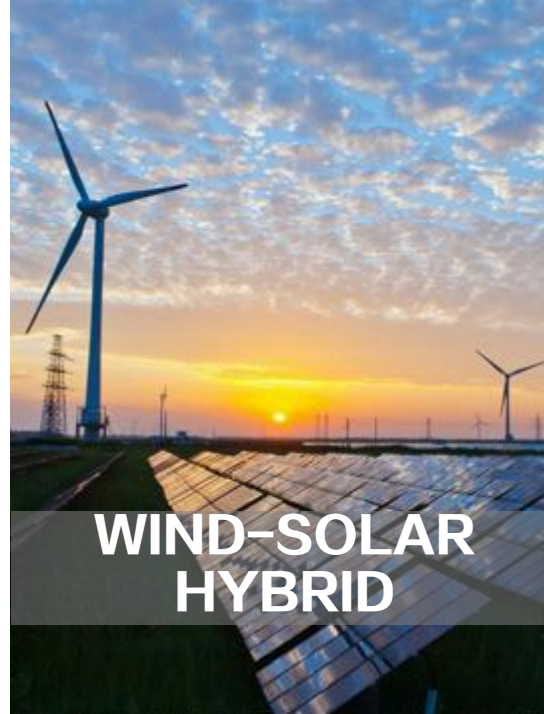

Professional wind power generation solutions

The company has a group of experienced professionals in the wind turbine industry, can provide professional wind power generation solutions according to customer needs.

Enterprise Profile

Basic information of the enterprise

At present, the main products are **300W-250kW wind turbine power generation system** and related accessories, **wind and solar complementary generator system**, all kinds of **permanent magnet generators** and so on. They are suitable for power plants, farms, families, coastal areas, remote areas, isolated islands, weather stations, outposts, tourist stations and so on.

Enterprise Profile

Basic information of the enterprise

The wind turbines system have exported to more than 70 countries and regions, such as Europe and America, Africa, Middle East, Southeast Asia, Australia and so on. And have got a worldwide reputation for our reliable performance, stable quality and first-class after-sales service.

Enterprise Profile

Basic information of the enterprise

Excellent Service

The export department will be in charge of customer service, you could not only have a direct and quick respond from us if there's any question about products, but also track the process of planning, production, QC, shipment in different stages.

Comprehensive Advantage

Professional factory with advanced production line and skilled workers;
creative products with competitive prices;
Whole technical support for good after sale service.

Reliable Quality

The products' quality has been tested by the market. Galaxy Wind Turbines are exporting to UK, US, Canada, Germany more than 100 countries with CE, ISO certification. And If it's a new type, we'll assess the technical feasibility and provide samples first to make sure it meets your requirements.

Competitive Price

The best experience in this area, with continually optimized sourcing, production and testing procedure, we've achieved a competitive cost controlling system, and the price we could offer wouldn't disappoint you.

Introduction to the product service

Product Service

Introduction to the product service

Wind Turbine

Converting the kinetic energy of the wind into mechanical energy, which is then converted into electrical energy, is wind power. Covering horizontal and vertical axis wind turbines.

Wind-solar Hybrid

The wind-solar hybrid power generation system makes full use of day and night, seasonal wind and solar energy resources to generate electricity, which is more economical, scientific and practical than wind turbines and solar energy alone.

Permanent Magnet Generator

The rotor of the generator is made of high quality rare earth permanent magnet material, and the stator is made of pure copper enameled wire and solid material. High power generation efficiency, smooth operation, small starting torque, high maintenance-free protection level.

Coreless Generators

The disk-type air-core permanent magnet generator produced by our company has many features such as low speed rating, low wind speed starting, small size, low energy consumption, light weight, compact structure and high efficiency.

Product Service

Hot Seller - Variable Pitch Wind Turbine

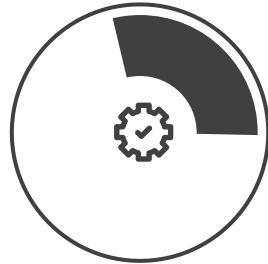

Product Service

Introduction to the product service

Hot Seller - Variable Pitch Wind Turbine

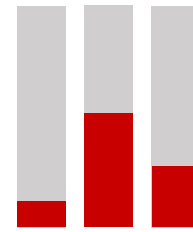

3-5 Years

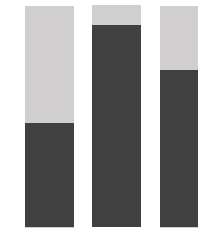

30%

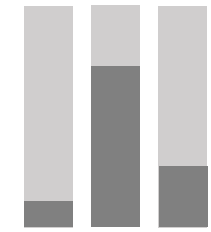

UL&INTERTEK

Leading Technology

Intelligent Control

High Efficiency Power Generation

ADVANTAGE

30% more energy output;

3-5 Years return on investment;

UL & INTERTEK safety and performance test

- No need to align the wind direction to operate.
- Power generation is usually more efficient in conditions of turbulence and gusty winds.
- Maintenance is more convenient.
