

Kronnek Systems

Empowering Intelligence Operation With FIELD-B

KRONNEK Systems is a cutting-edge technology company specializing in providing advanced tactical intelligence solutions. Our systems are designed to offer seamless integration and high-level performance in critical operations. We deliver customized solutions for both vehicle-based and portable intelligence gathering, with a focus on versatility, durability, and secure communication.

Our flagship products, the FIELD-B Portable Tactical Intelligence System, are built with state-of-the-art components and technologies, offering superior capabilities for communication monitoring, spectrum analysis, and covert operations.

FIELD-B is a lightweight, portable system ideal for field operations, delivering real-time communication monitoring and tactical support in dynamic environments.

KRONNEK Systems ensures that all solutions are user-friendly, highly adaptable, and can operate in the most challenging scenarios, empowering security, defense, and intelligence teams to carry out their missions effectively.

Kronnek Systems

FIELD-B Portable Tactical Intelligence System

The FIELD-B Portable Tactical Intelligence System is a complete portable tactical system that allows to identify, locate and intercept any target mobile phone on 2G, 3G, 4G (FDD and TDD) and 5G NSA. The backpack has 4x 4W power amplifiers to achieve the best results in the field.

The FIELD-B Portable Tactical Intelligence System is the solution designed for field operations. It combines lightweight portability with advanced communication monitoring capabilities, making it ideal for urban, rural, and challenging terrains. Built for tactical missions, it offers extended battery life, compact design, and real-time spectrum analysis to support critical decision-making in dynamic environments. Key

Key Features

- 1. Supporting 2G, 3G, 4G & 5G (NSA) (FDD & TDD) technologies
- 2. Integrated stealth technology for secure and covert operations.
- 3. Up to 2H with two batteries, supports hot-swap.
- 4. Up to 4x independent SDR transmissions
- 5. Safety Features.
- 6. 4W Power Amplifier x4
