

AI × FINANCE

TREND RADAR:

Generative AI for Financial Reporting

FINTELLECT AI

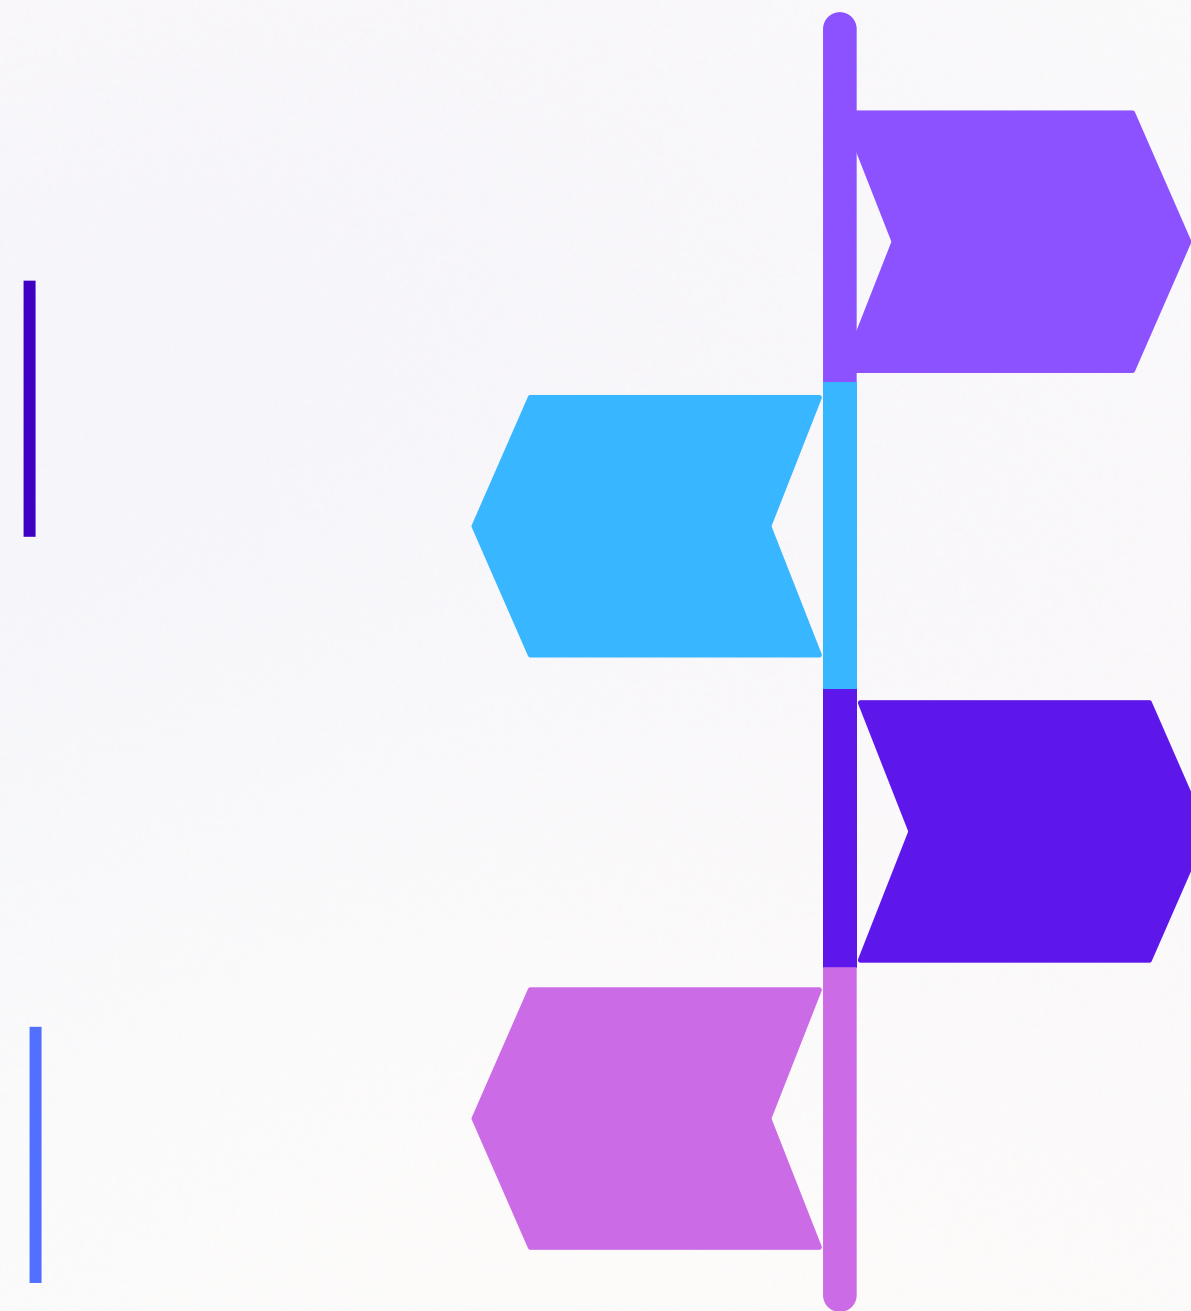

Automated Narrative Reporting

"Who still writes quarterly reports by hand?"

Generative AI transforms raw numbers into polished management discussion & analysis (MD&A;) drafts in minutes.

Try this: Use AI to auto-generate your monthly financial summary and let your CFO refine, not rewrite.

Instant Variance Analysis

" "Why did our expenses spike this month?"

AI highlights anomalies in revenue and cost centers, explaining variances in plain English for board packs.

Try this: Ask AI to generate a one-page variance narrative for your latest P&L

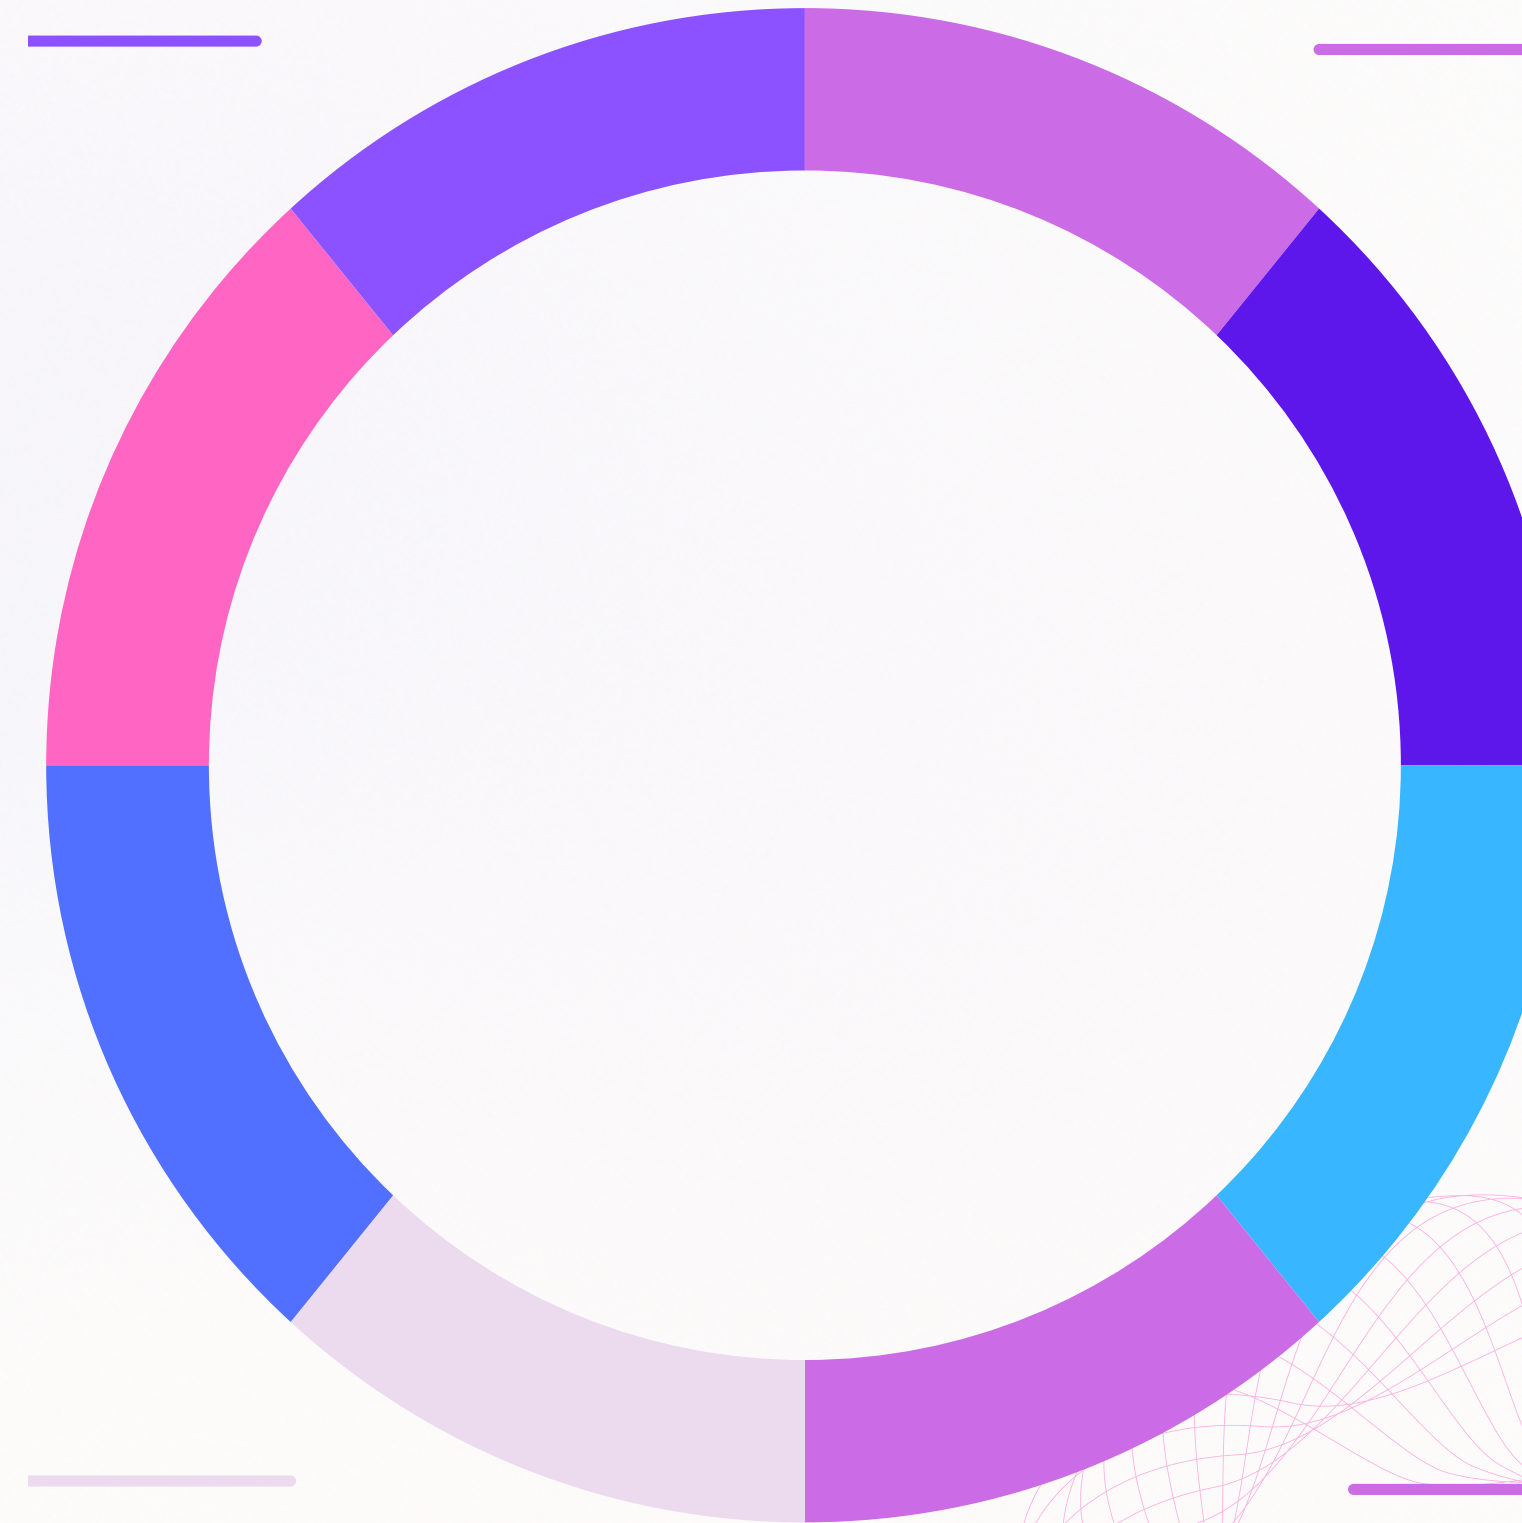

ESG & Regulatory Disclosures

"Can we keep up with the disclosure avalanche?"

GenAI scans evolving frameworks (CSRD, IFRS, SEC) and drafts compliance-ready notes tailored to your sector.

Try this: Use AI to create a first draft of your ESG disclosure sections directly from internal data.

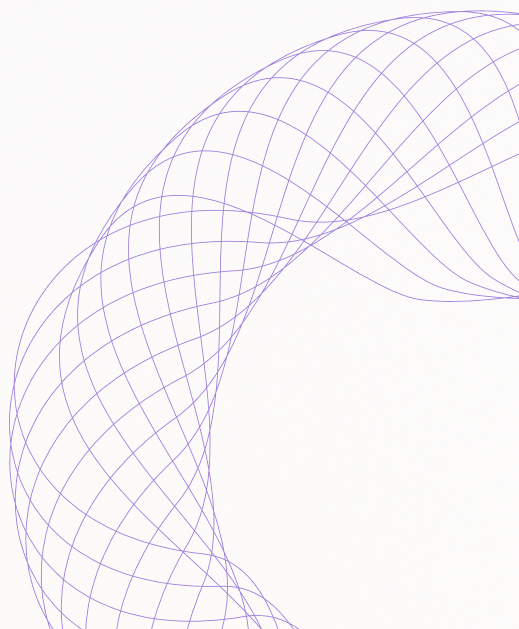

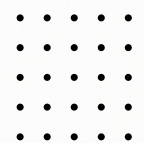

Audit-Ready Documentation

"What if the regulator asks tomorrow?"

AI auto-generates traceable footnotes and reconciliations, making audit trails transparent and consistent.

Try this: Train AI to flag missing links between trial balance entries and narrative reports

Real-Time Board Insights

"Can we stop waiting for month-end?"

Instead of static reports, GenAI delivers on-demand executive snapshots—KPIs, risks, opportunities—straight from live data.

Try this: Build an AI-powered dashboard that updates your board pack narratives daily.
