

ORDER EFFICIENCY LTD.

COMPANY PROFILE

Order Efficiency Ltd is a leading innovator in project management and optimization, dedicated to enhancing project efficiency through its Project Health Control™ (PHC™) service. With operations expanding globally, including a focus on Africa, the company leverages cutting-edge technology to prevent project delays and reduce overspending, ensuring projects in industries such as oil, gas, construction, and engineering are completed on time and within budget.

Vision & Mission

Vision

To transform the global project management landscape by introducing the innovative PHC system, promoting transparency, enhancing profitability, and fostering sustainable development and social progress.

Mission

To deliver groundbreaking project management solutions that optimize resources, foster local employment, and contribute to environmental sustainability. Committed to ESG excellence, we dedicate 10% of our earnings to social responsibility initiatives that drive lasting, measurable change

Core Service: Project Health Control™ (PHC™)

Project Health Control™ (PHC™) is a comprehensive project monitoring system designed to:

- Prevent delays and overspending
- Create transparency over project deliverables
- Encourage early completion through incentivization
- Share efficiency savings with project stakeholders, promoting local job creation and social initiatives

Key Benefits of Project Health Control™

Cost Efficiency

Provides detailed oversight to prevent overspending, reclaiming up to 80% of project funds lost to inefficiencies

Incentivization

Stakeholders are financially rewarded for increased productivity, fostering a culture of accountability and collaboration.

Early Completion

Offers project owners the option to incentivize early completion, saving time and costs.

Local Job Creation

Prioritizes the hiring of local professionals in key markets like Nigeria, reducing unemployment and promoting skill development.

Social Responsibility

Dedicates a portion of profits to environmental and community-based projects, enhancing public health and sustainability.

ESG-driven Commitments

- 1** Providing career advancement opportunities for local professionals to manage strategic projects while upholding ESG standards in governance and operational excellence.
- 2** Offering Low-Skilled Job Opportunities
Through social and environmental initiatives—such as street and coastal clean-ups, tree planting, and ecological restoration—we create employment pathways that support sustainable development and social equity.
- 3** Empowering Local Communities
Investing in socially responsible projects that generate long-term environmental, social, and economic benefits, ensuring measurable ESG impact and fostering resilient communities.

Leadership Team

David Winter

Founder and Lead Consultant with decades of experience in project management, David spearheads the development and global implementation of PHC™

Professor PLO Lumumba

A distinguished Pan-Africanist and advocate for good governance and anti-corruption in Africa.

Remzi Bajrami

Seasoned entrepreneur and author with expertise across various industries, from real estate development to software and finance.

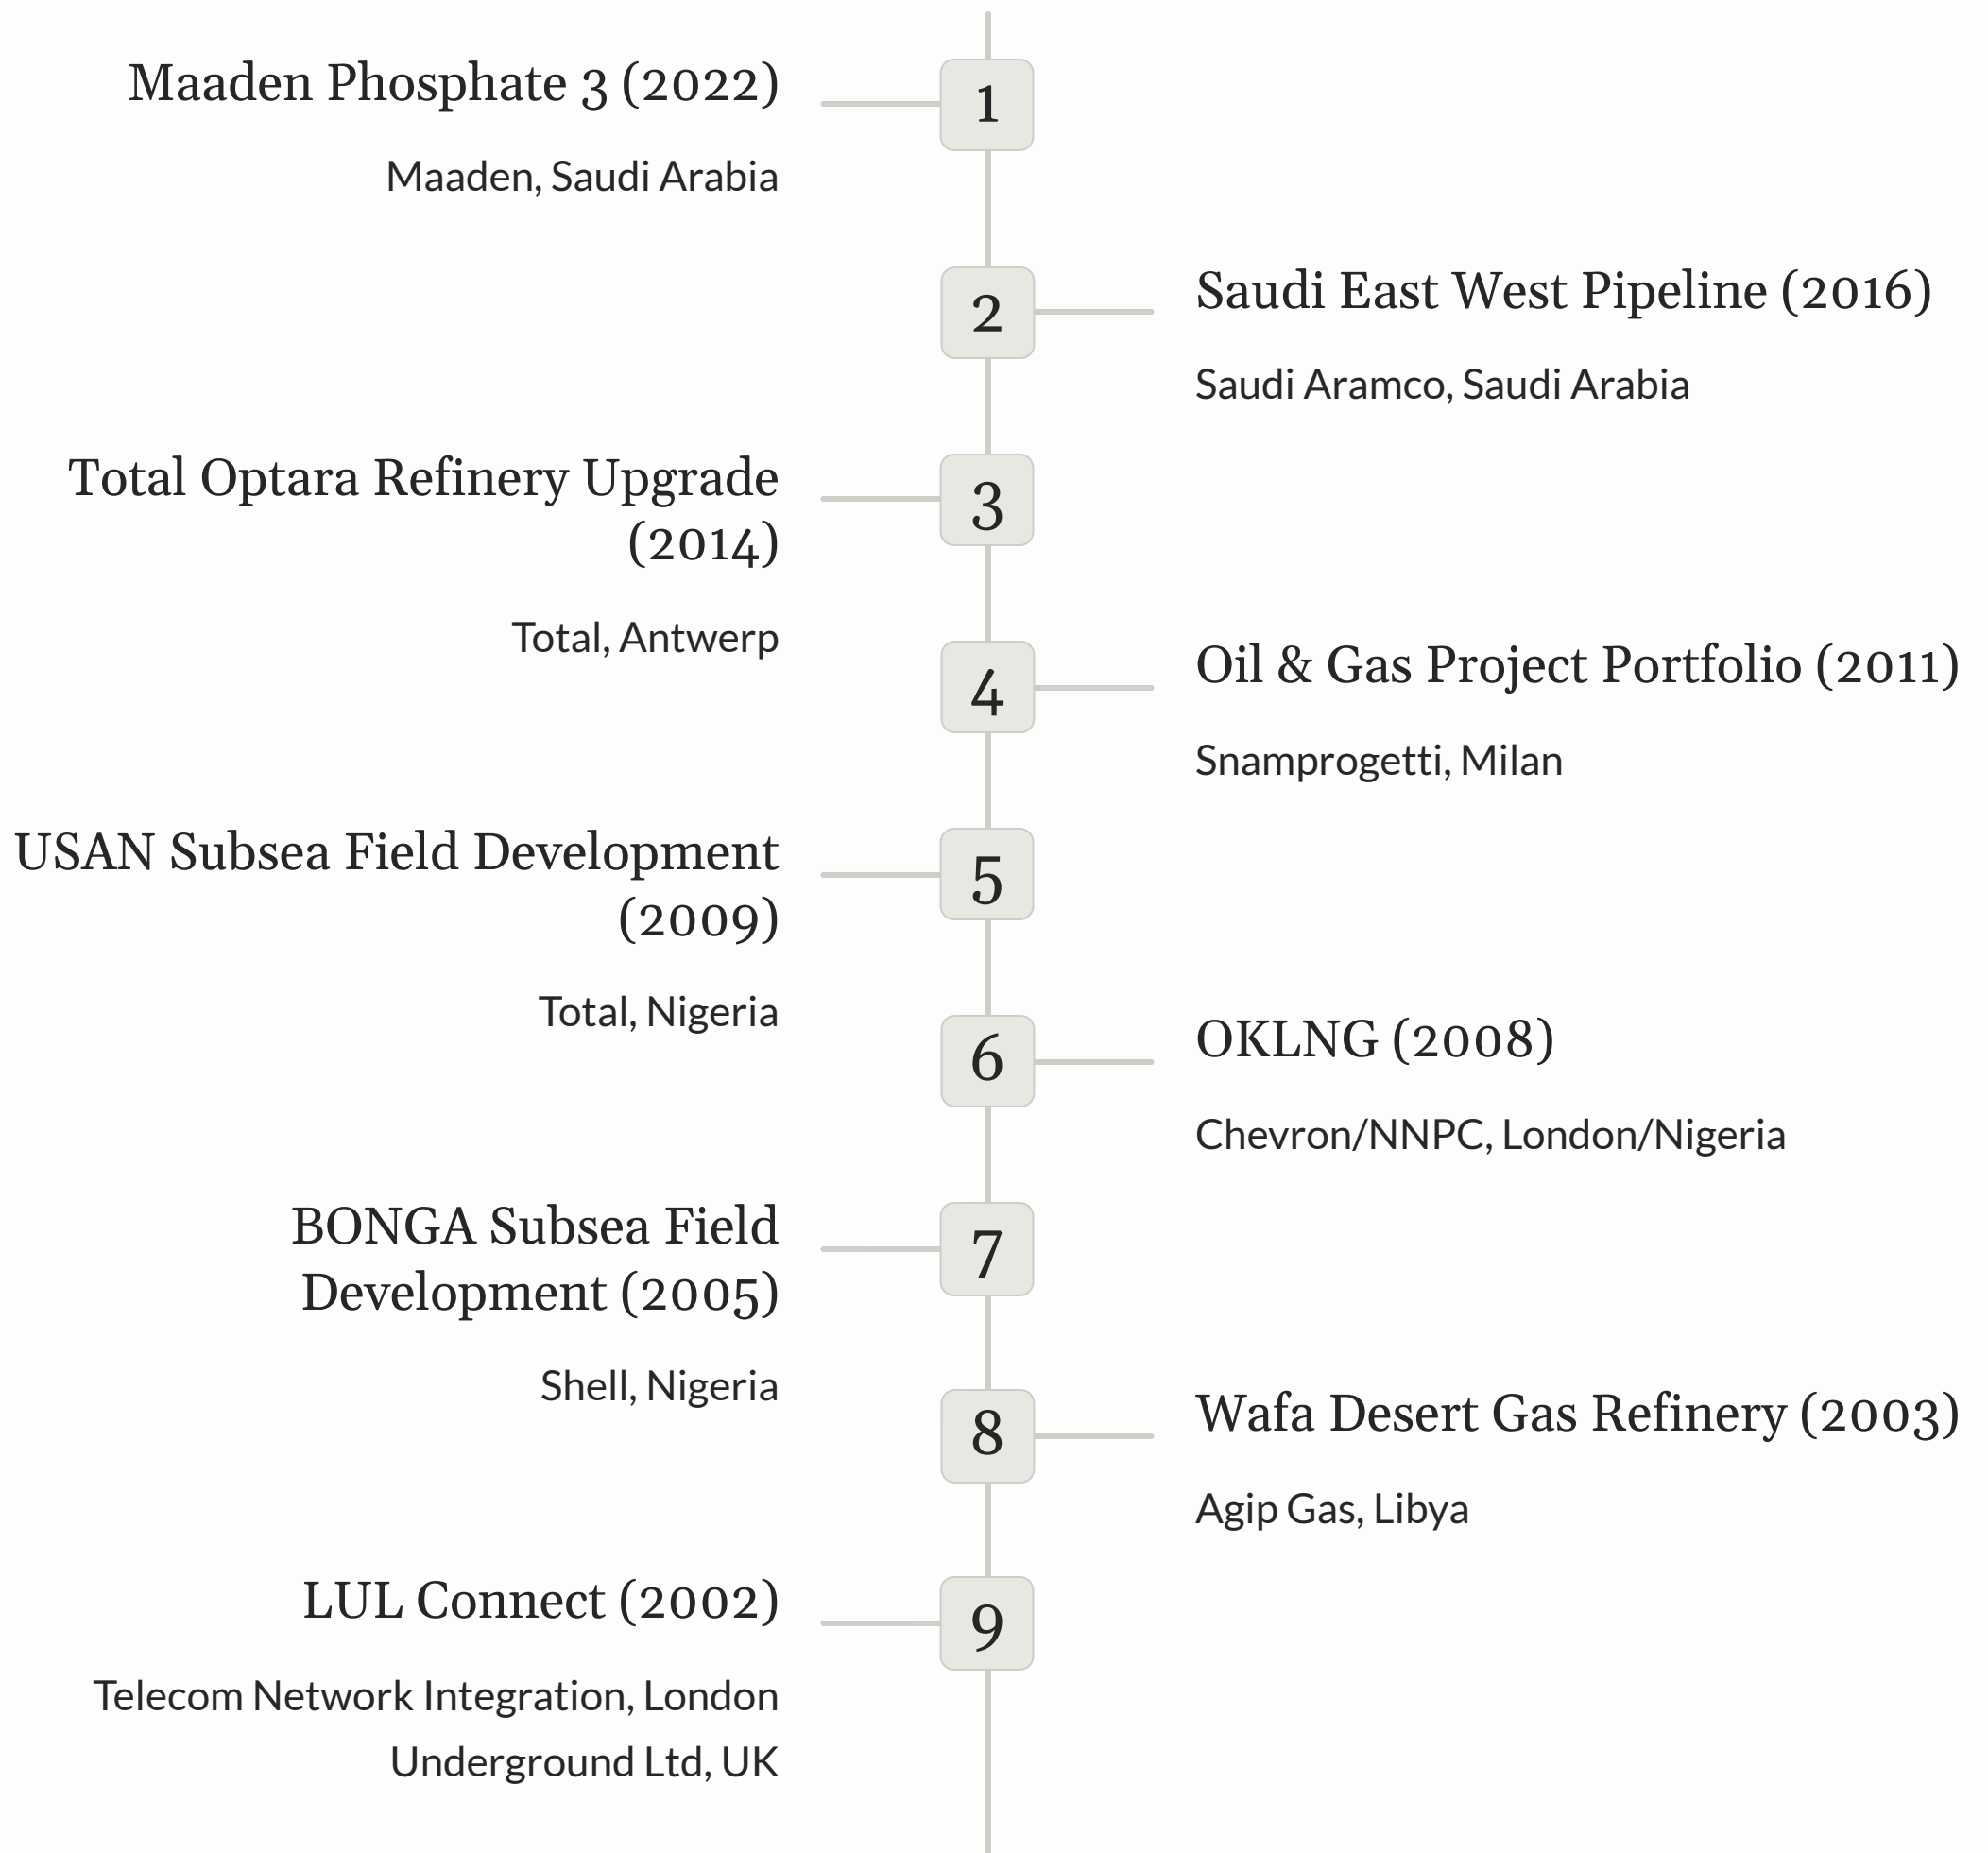

Abu-Bakr Harakat

Engaged in global regenerative projects, a political organizer and project manager specializing in leveraging technology to achieve strategic goals.

Past Projects

Project Health Control (PHC) Methodology stands as a testament to over 20 years of dedicated refinement and real-world application. Born from David Winter's extensive project management experience across diverse industries and scales

Client Testimonials

PHC's journey began with the foundational principles honed by David Winter during his early career. Over two decades, these principles were tested, refined, and adapted to meet the ever-changing demands of industries ranging from telecommunications to infrastructure.

This was the first time I had seen this approach for management of project issues. My project had a list of more than 450 issues when it was handed to me, well over 50 of them mission critical. David's system provided a means of tracking and accountability, making it possible to resolve all of the major issues in a structured way during a 4 month intensive period leading up to successful achievement of first oil.

- David Webster, Project Manager for First Oil, Shell Bonga Subsea Field Development.

By integrating PHC principles into the project, David ensured that risks and issues were not only effectively managed but proactively mitigated through a structured action-tracking system. His expertise in streamlining risk management processes delivered measurable improvements, driving efficiency and project stability.

- Murtaza Uddin, Quality Assurance Manager, Ma'aden Phosphate 3 Project

There are over 600 locations required as part of the Telecommunications Network Integration Project. The techniques used on the power upgrade portion of this project to compare and contrast conflicting information sources were very impressive. I found this kind of analysis invaluable in keeping all of the sources correct in the face of continually evolving objectives.

- Andrew Smart, Project Commissioning Manager, London Underground Ltd, LUL Connect Project (2002)

Social Responsibility

The social responsibility initiatives of Order Efficiency Ltd. reflect its commitment to creating a meaningful and lasting positive impact on society and the environment. By allocating 10% of its annual revenues to these efforts, the company actively integrates purpose with profit, demonstrating its role as a conscientious corporate citizen.

Environmental Restoration

Order Efficiency Ltd. recognizes the urgent need to combat environmental degradation. Efforts like **coastal clean-ups** address waste accumulation along coastlines, protecting marine life and preserving biodiversity. **Tree planting** projects help combat climate change by sequestering carbon dioxide, improving air quality, and preventing soil erosion. Other ecological projects further aim to restore and sustain natural ecosystems, contributing to a healthier planet for future generations.

Community Development

Strengthening communities is central to the company's mission. Through targeted programs that focus on public health improvements, the organization helps tackle pressing issues such as access to clean water, sanitation, and healthcare. By prioritizing **local employment initiatives**, Order Efficiency Ltd. boosts economic resilience, empowering individuals with steady income opportunities and fostering self-reliance in the communities it serves.

Educational Programs

Investing in education is a cornerstone of sustainable development. Order Efficiency Ltd. supports **skill-enhancement opportunities** tailored for students and local workers, equipping them with knowledge and tools to thrive in an evolving job market. This commitment not only uplifts individuals but also strengthens local economies by cultivating a more skilled workforce capable of driving innovation and progress.

Contact Order Efficiency Ltd

Order Efficiency Ltd invites organizations to explore the benefits of Project Health Control™ (PHC™). With its proven results in reducing costs, improving project timelines, and creating local jobs, PHC™ is now available globally to meet the needs of industries seeking efficient and socially responsible project management solutions.
