

Timetable

Information and instruction

The program is designed for manual and automatic layout of work schedules by task, executive groups and available rooms. The usefulness of the program has been verified during many years of arranging the timetable in the faculty of a higher educational institution.

It is possible to plan the arrangement of both lectures (carried out simultaneously by several groups) and exercises and projects, carried out by individual groups.

Copyright © 2009-2024 Michał Kowalczyk, Poland
info@mkplan.eu

Basic features of the program

- Division into groups, positions and tasks.
- Division into cycles (e.g. days) and smaller units (e.g. hours)
- Automatic and manual control of the distribution of tasks over time
- Conditions, allowing division into individual managers (teachers), assigned to groups of tasks
- Occupancy controls for groups, positions and managers
- Reservation of groups and positions and import of reservations from other projects
- Presentation of the results of task scheduling in vertical and horizontal form, with the possibility of distinguishing a group of tasks of one executive unit (e.g., the workplace)
- Wide range of control over the graphic form of presentation
- Export of results in the form of BMP, JPG, CSV, ICS files and printing
- Calendar of allocation of individual cycles (e.g. days) from the plan to days in the year

Features of tasks, groups and rooms

The various elements of the plan are described in the tables by a series of characteristics, the fulfillment of which is a prerequisite for the execution of a correct scheme of action

Each task has the following features:

- name
- duration,
- the minimum number of positions for its implementation
- the maximum number of simultaneous implementation of a given task in the plan
- the range of groups to carry out a collective task (such as a lecture)
- the initial moment of placing tasks in the schedule
- taking into account the break, associated with the task
- color assigned to the task

Each group is characterized by:

- name
- a list of tasks to be performed
- the number of necessary completion of each task

Each position (room) is described by:

- name
- list of tasks to be performed
- the way of its application: excluded, possible or necessary

Elements of control during the layout of the plan

Main window of the program

It defines the main parameters of tasks (subjects), groups of performers (students, pupils) and rooms, intended for the implementation of tasks (lessons).

The screenshot shows the main window of the 'TimeTable' program. The window title is 'TimeTable no name'. The menu bar includes 'File', 'Settings', 'Results', and 'Help'. A 'Find:' search box is present. Below the menu bar, there are tabs for 'Subjects', 'Groups', and 'Rooms'. The 'Subjects' tab is active, showing 'N. Subjects = 1' with a checked checkbox and a value of '0'. There is an unchecked checkbox labeled 'break blocks the room'. A table with columns: 'subject', 'duration', 'rooms mi', 'subjects', 'gr.first', 'gr.last', 'beginning', 'break', 'tint', and 'state' is displayed. The 'state' column shows 'T=0, Grou'. At the bottom, there are navigation buttons and labels for 'Cycle = 8' and 'NCycles = 7'. Red arrows point from text labels to specific UI elements: 'main menu' points to the menu bar; 'industry nomenclature and language options' points to a button with 'U' and a flag icon; 'tabs of objects and their characteristics' points to the 'Subjects' tab; 'number of hours in a cycle (e.g. day)' points to 'Cycle = 8'; and 'number of cycles (automatically increased)' points to 'NCycles = 7'.

main menu

industry nomenclature and language options

Subjects Groups Rooms

N. Subjects = 1 ☒ 0 ☐ break blocks the room

subject	duration	rooms mi	subjects	gr.first	gr.last	beginning	break	tint	state
									T=0, Grou

Cycle = 8 NCycles = 7

tabs of objects and their characteristics

number of hours in a cycle (e.g. day)

number of cycles (automatically increased)

Tasks tab

Lessons, lectures, exercises and projects, carried out by individuals or teams of performers, pupils or students, can be considered as tasks.

finding a job by name

changing the width of the name column

entering values to a task group

blocking a job during a break

moving the highlighted tasks in the table

The screenshot shows the 'Tasks' tab interface. At the top, there is a 'Find:' search box and a '1 column' dropdown menu with 'constant' and 'sizeable' options. Below this are tabs for 'Subjects', 'Groups', and 'Rooms'. A section labeled 'N. Subjects = 1' contains a checked checkbox, a '0' input field, and a 'break blocks the room' checkbox. A table is displayed with columns: 'subject', 'duration', 'rooms mi', 'subjects', 'gr.first', 'gr.last', 'beginning', 'break', 'tint', and 'state'. The first row of the table is highlighted in blue. A red box highlights the first row of the table, and a red arrow points to it from the 'moving the highlighted tasks in the table' label. Another red arrow points to the 'duration' column header from the 'entering values to a task group' label. A third red arrow points to the 'break' column header from the 'blocking a job during a break' label. A fourth red arrow points to the 'Find:' search box from the 'finding a job by name' label. A fifth red arrow points to the '1 column' dropdown menu from the 'changing the width of the name column' label.

Edit task features:

- duration,
 - number of minimum rooms needed
 - maximum number of simultaneously performed tasks
 - the range of groups (gr.p - gr.k) for a collective task (e.g. lecture), set in the "Groups" tab
 - the beginning of the start of the task (subject) in the plan
 - break
 - colors (select the range of tasks and assign in the - **Settings - Visual parameters** - lower part of the window, indicated colour number and "To objects" button)
- The color is created in the lower left part of the "**Visual parameters**" window.

The last column of the table "**Subjects/Lessons/Tasks**": **state** is used to inform about errors in planning and give the reason why the item does not appear in the plan distribution:

T=0	: declared zero execution time
Groups=0, Classes=0, Persons=0	: no groups/classes/persons to perform the subject/task
NRrooms<NRmin	: number of available positions/rooms is less than the number required by the subject/task
NSubjects_max<1, NTasks_max<1	: the maximum number of subjects/tasks performed simultaneously is less than one
Cycle<T	: the execution time of the subject/task is not within the time of one cycle/day

Names of tasks, groups and rooms can be entered in the main menu option: **Settings - Names**.

Groups tab

Defines information on how many times a certain task must be performed by a certain group of students, pupils or other performers.

moving the highlighted groups in the table

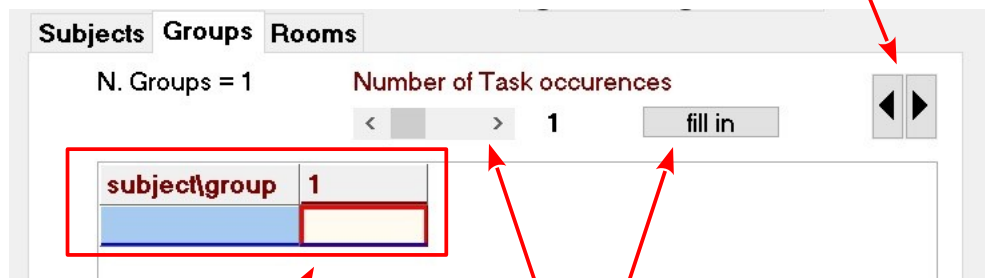

table of the number of task completion
by individual groups

filling marked
with the given value

Groups tab sub-menu (available under the right mouse button):

inserts the selected range of groups
for the assignment of a collective task (e.g. lecture)

inserts a group before the indicated one

inserts a task before the indicated one

duplicates settings to a new task

deletes selected groups

deletes selected tasks

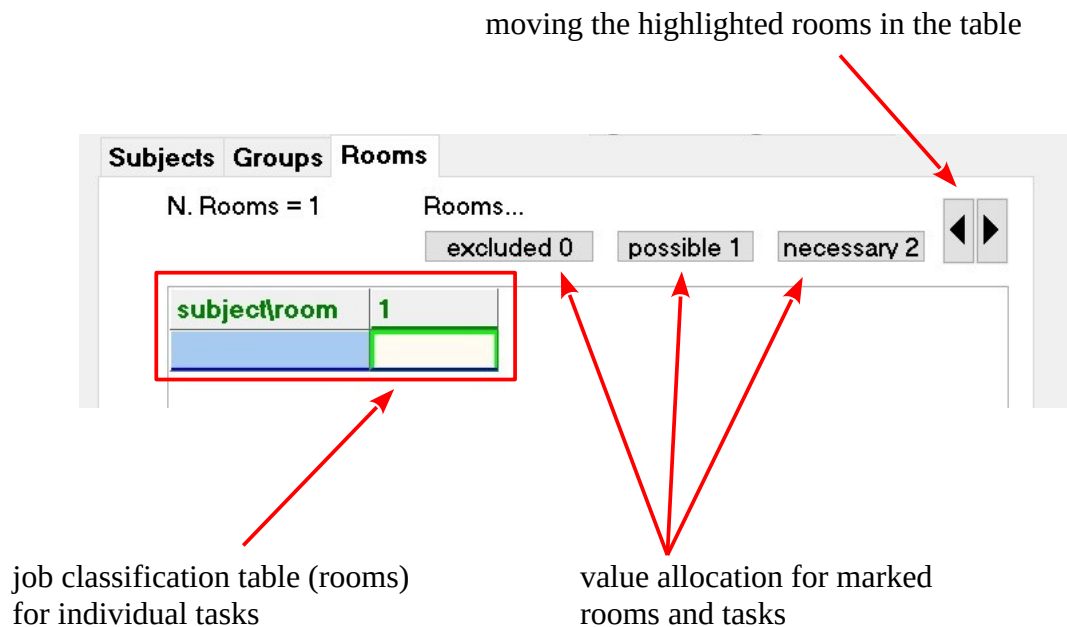

Note ! The actions are irreversible. Be sure to save the project regularly.

Rooms tab

Provides information on the possibility or necessity of using a particular room or room for a particular task, lesson, subject or other activity.

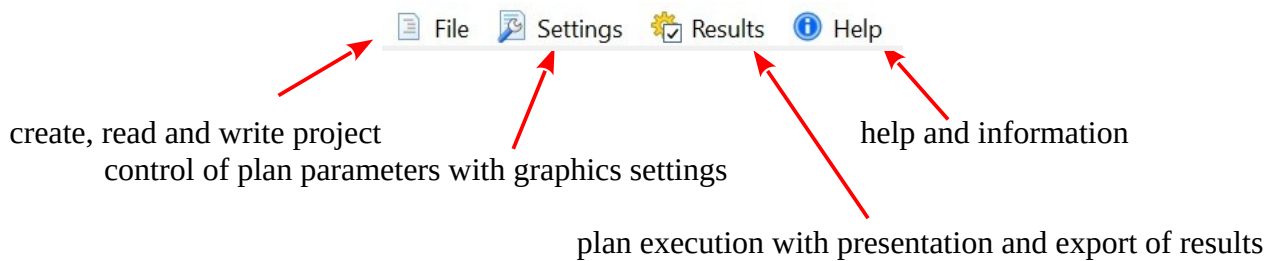

Sub-menu of the **Rooms** tab (available under the right mouse button)

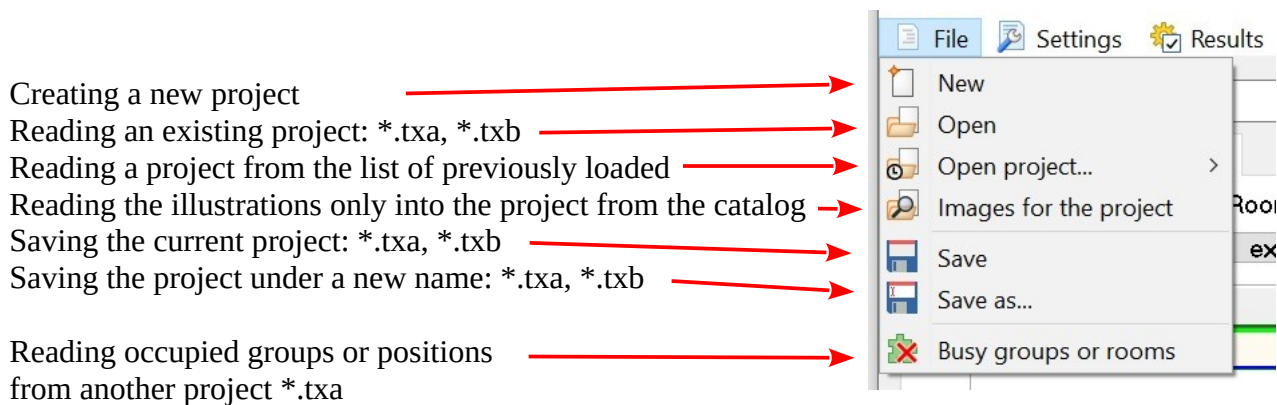

Note ! The actions are irreversible. Be sure to save the project regularly.

Basic information

Edit the names of tasks, groups and rooms

Main menu - Settings - Names

Naming the objects is necessary for the correct arrangement of the timetable.

The screenshot shows the 'Names' window with the following annotations:

- bookmarks with objects**: Points to the 'Subjects', 'Groups', and 'Rooms' tabs.
- reading from a text file**: Points to the 'From file' button.
- write to text file**: Points to the 'To file' button.
- deleting the marked**: Points to the 'Delete' button.
- loading from the table**: Points to the 'From table' button.
- placement in the table (diagram)**: Points to the 'place' column in the table.
- the place of marking the object with an illustration (optional)**: Points to the 'image' column in the table.
- illustration file (optional)**: Points to the 'image' column in the table.

N.	Name	place	image

Under the right mouse button is an optional menu for selecting the file of the illustration denoting the object and setting this illustration in relation to the object emblem in the timetable diagram.

Note ! Marking with illustrations the objects of the plan is not necessary for its arrangement.

Position of the illustration in relation to the object emblem

Loading an image illustrating an object

Conditions for task managers (optional)

They refer to tasks that cannot be performed simultaneously or must be performed in a specific order.

Main menu - Settings - Assumptions

Number of task exclusion lists

Set the type of condition:
None, Separately, in Order

In each box, a list of exclusionary
Tasks along with the name(e.g., the name of the manager)

inclusion of selected tasks in the presentation
(does not change the basic presentation of the plan
diagram)

The menu under the right mouse button allows you to
select tasks for groups, in which they cannot be
implemented at the same time (for example,
implemented by a certain teacher or employee):
- *Separately*
or they should be done in the set order:
- *in Order*.

Similar to the **Names** item from the previous subsection,
it is possible to illustrate the tasks of each condition
e.g., with portraits of performers (optional).

- Assumptions: list subjects
- Assumptions: set subject order
- Assumptions: insert list before
- Assumptions: delete list

0

Image

The selection of tasks to groups and the group names are determined when the option is selected:
Assumptions: list subjects from the menu, associated with the given row of the **Assumptions** table:

Name of the list of mutually exclusive tasks
(e.g., the person conducting the listed tasks, lessons)

Tasks from the main table to select
(they will appear in the list of excluded tasks)

Set the order of tasks,
if the condition is of this nature
(in Order)

The screenshot shows a dialog box titled "Tasks to list". It contains a text input field labeled "Task list name". Below this is a list box containing a single item "1 :". To the right of the list box are two vertical arrow buttons (up and down). At the bottom of the dialog are two buttons: a green checkmark button and a red 'X' button. Red arrows from the text on the left point to these elements: one to the "Task list name" field, one to the list box, one to the list box's right side (near the arrow buttons), and two pointing to the checkmark and 'X' buttons respectively.

Overview window

Presents a collective picture of the plan

Groups during the implementation of the plan:

Rooms during plan implementation:

The presentation range in the **Arrangement** window is shown here with a red frame.
The extent of the plan to be printed is shown here with a green frame.

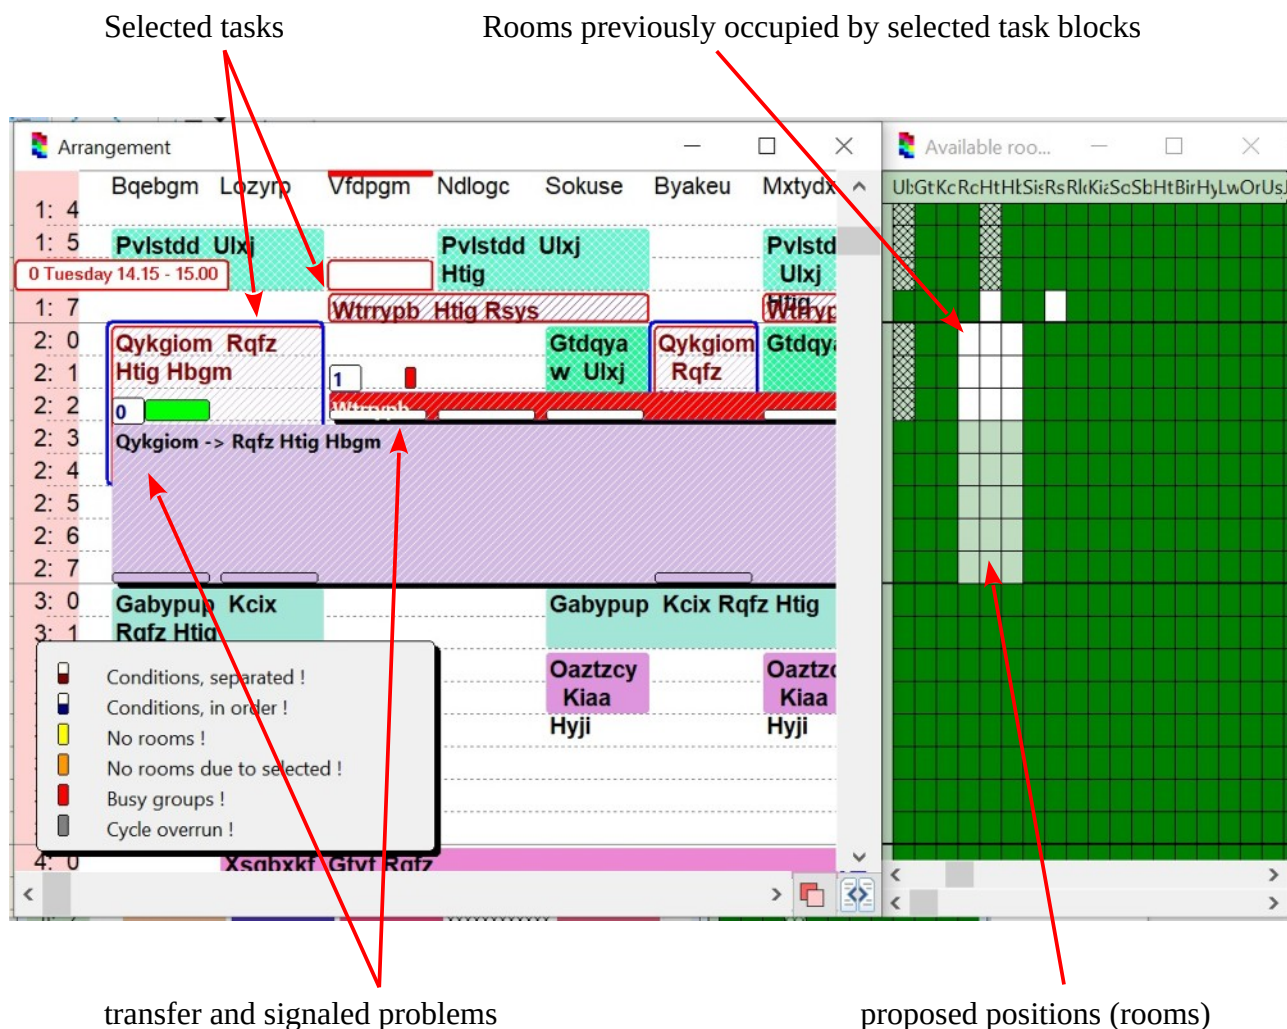

Control is done by holding the left mouse button in the view box, then the image in the **Arrangement** window and in the side panels (**Time** and **Available rooms** or **groups**) changes.

Controlling the movement of tasks in the Arrangement window

In the **Arrangement** window, you can move backward or forward the selected task blocks. This is done by using the mouse wheel.

You can also use the function to automatically search for vacant (non-blocked) positions in the scheme, using the **Forward** and **Backward** buttons from the **Results** window.

Approval of the transfer is done with the **Transfer** button in the **Results** window.

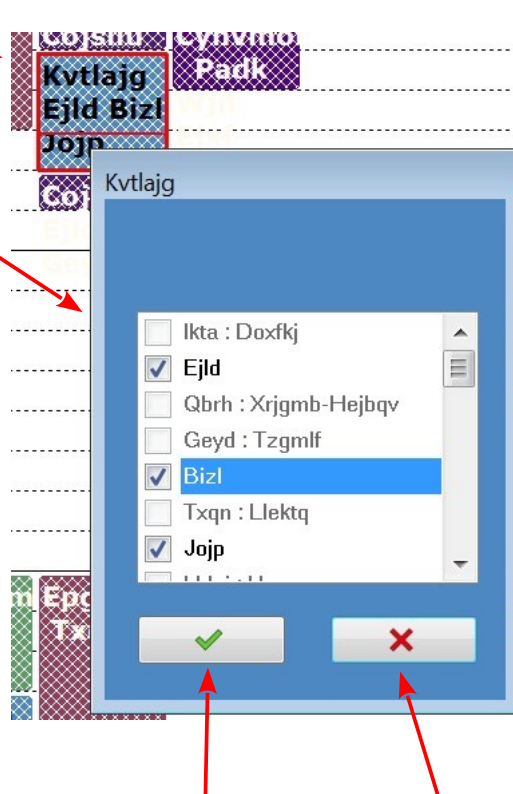

Manual assignment of rooms to a task block

The schema in the **Arrangement** window should show the distribution of tasks for groups. For a task block in the schema, in addition to the settings in the table, you can manually assign jobs. To do this, block the task in the schema and use the **Alt** button.

In the selection window, select the desired free rooms and confirm (this window is similar to the assignment of conditions for managers and the selection of tasks for individual presentation).

The indicated block of the task (locked in the schema)

selection window of available positions (rooms)

approval of changes or resignation

Checking the correctness of the scheme

Main menu - Results - Report and control

The report gives information on the compliance of the scheme with the assumptions, included in the tables. Summaries are given for groups and positions with busy (**Z**), free (**W**) and reserved (**R**) time.

total number of occupied time units occupied free reserved

Report

Yroo: zp= 0 (ok); Z= 0.0%; W= 100.0%; R= 0.0% | ^

Bjfa: zp= 0 (ok); Z= 0.0%; W= 100.0%; R= 0.0% | |

Room average: Z= 9.8%; W= 90.2%; R= 0.0%

refresh the list of cycles

and deleting the contents of the calendar

calendar table setting

(control dimensions and typeface)

selection of day assignment to the indicated cycle (**left** mouse button)

allocate all cycles from the indicated one immediately (**right** mouse button)

enable the indication of the current moment in the **Arrangement** window with the plan background

Example of an excerpt from the **Arrangement** window with the moment of the plan:

inside a unit time position:

between two positions:

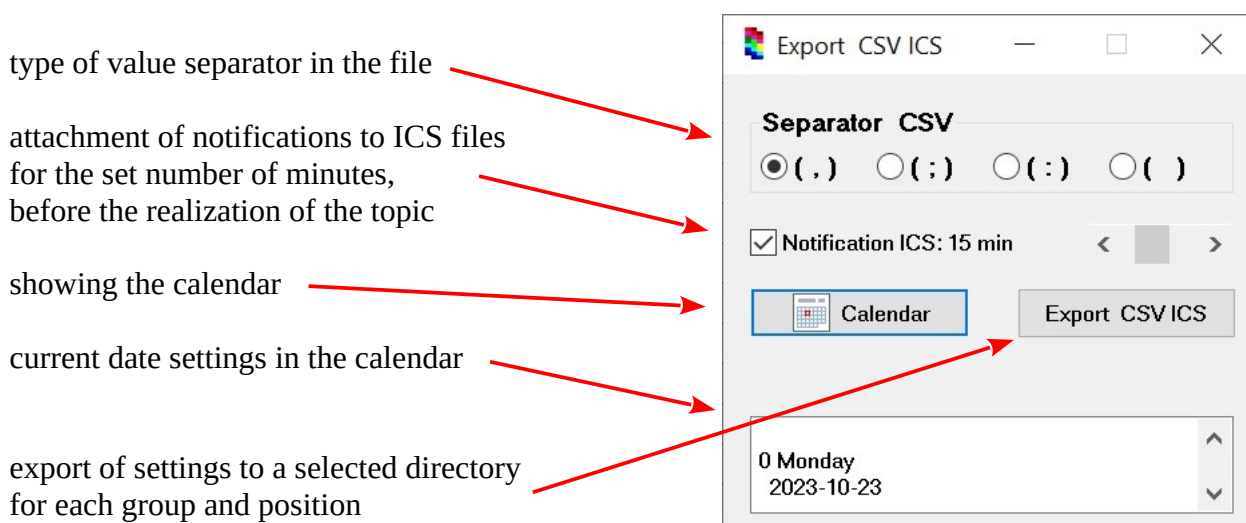

Export CSV ICS

Main menu - Results - CSV ICS export.

CSV ICS export leads to the simultaneous generation of CSV (Comma Separated Values) type and ICS type open calendar standard files for the set and individual groups and positions separately, based on a pre-filled calendar. It is necessary, for this purpose, to indicate the location and provide the name of the assumed destination directory. You can choose different types of separator (not just comma).

CSV and ICS files can potentially be used as the distribution of the calendar of classes in Android® and iOS® for individual participants in the implementation of the plan.

In order to ensure the correct operation of timekeeping and calendar, the data of the list of items of moments (hours) of plan execution in the **Export and Print** window must be given according to the scheme:

HH.MM - HH.MM

Where HH and MM represent the hour and minute of the start and the hour and minute of the end of the plan unit. For example: **08.15 - 09.00**

The generated CSV files consist of the following elements:

Subject, Start Date, Start Time, End Date, End Time,
All Day Event, Description, Location, Private

separated by a selected separator.

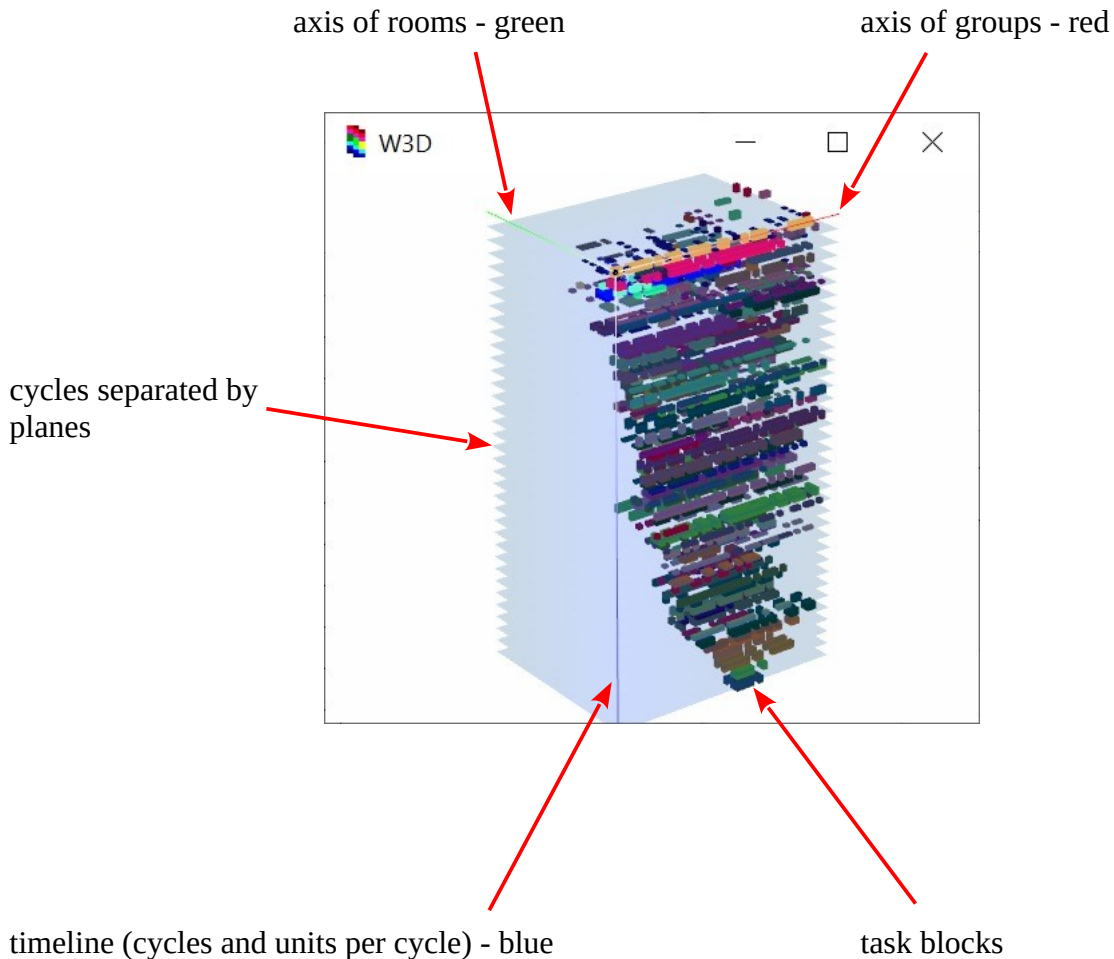

A three-dimensional view of the class layout diagram

Main menu - Results - 3D layout.

The diagram can be viewed as a three-dimensional presentation.

Controlling the viewpoint is done by moving the mouse and locking it with the left mouse button. Zooming in and out is done with the mouse wheel.

Import group and room reservations from another project

It is possible to load the reservation status of groups and positions from another project, in order to avoid conflicts during plan execution.

Main menu - File - Occupied groups or positions

The moment of importing reservations from another project (marking the beginning)

common groups or rooms with another project

Enabling the display of the occupancy status of groups and rooms from another project (necessary to make a reservation)

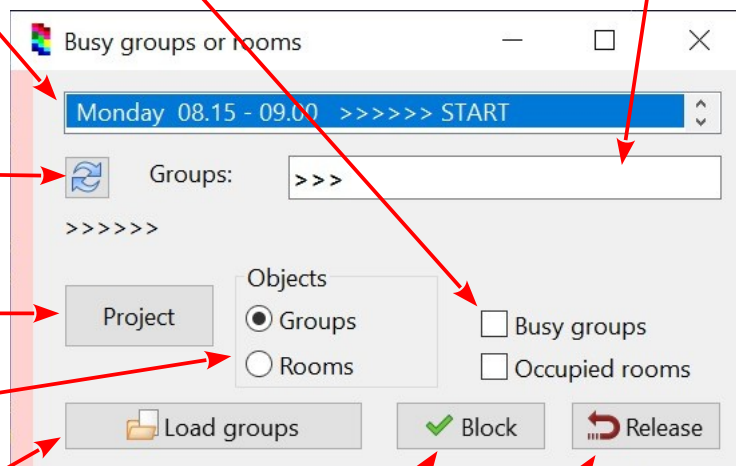

refresh time of the current project

location of another project

selection: group or room

loading occupancy groups or positions to the current project

reservation and release of all occupied groups or positions from another project in the current project (if they do not overlap with the current task blocks)

Presentation of occupancy of groups and rooms from another scheme (project):

groups:

rooms:

Once they are made visible, you can turn bookings on and off for everyone at the same time.

Background and diagram frames (optional)

The timetable diagram can be presented with a changed background and superimposed illustrations (showing symbols of the organization, for example). The settings of the background parameters can be accessed from various places in the main menu and the **Background** button:

Settings - Visual parameters - Background

Results - Export and Print - Background

Settings for the type and thickness of horizontal and vertical, main and subordinate lines

setting the general background of the various parts of the diagram presentation, as in the Export and Print window (center panel, hours, days - cycles, title, legend).

Click the right mouse button and the color from the **Settings - Visual parameters** will be assigned to the indicated presentation element

enable background mosaic option

inclusion of selected images

increase the size of the mosaic of
background fragments

Selecting illustrations and their location relative to the diagram (must first be done **Preview** in the **Results - Export and Print** window).

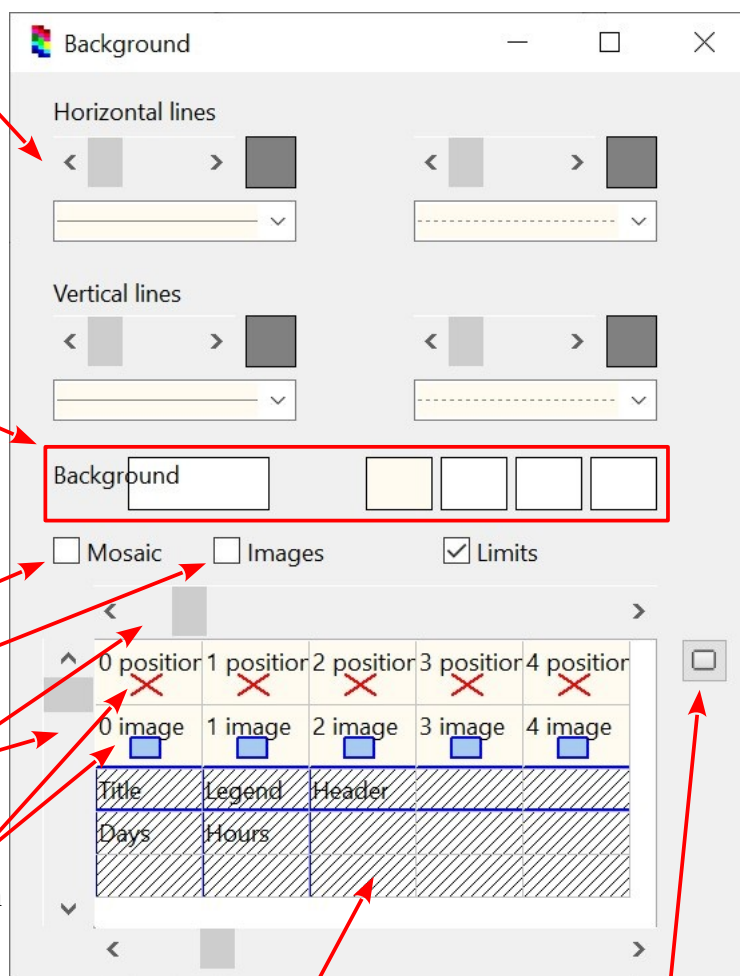

Left and right mouse buttons.

setting the color of individual parts of the background mosaic of the diagram

To the color from Settings - Visual parameters.

The mosaic is repeated over the entire plan area.

zeroing the selected fragment of the mosaic

Defining the position of the illustration - mouse buttons:

Left - position the illustration in the window
(window will appear: **Position of illustration**)

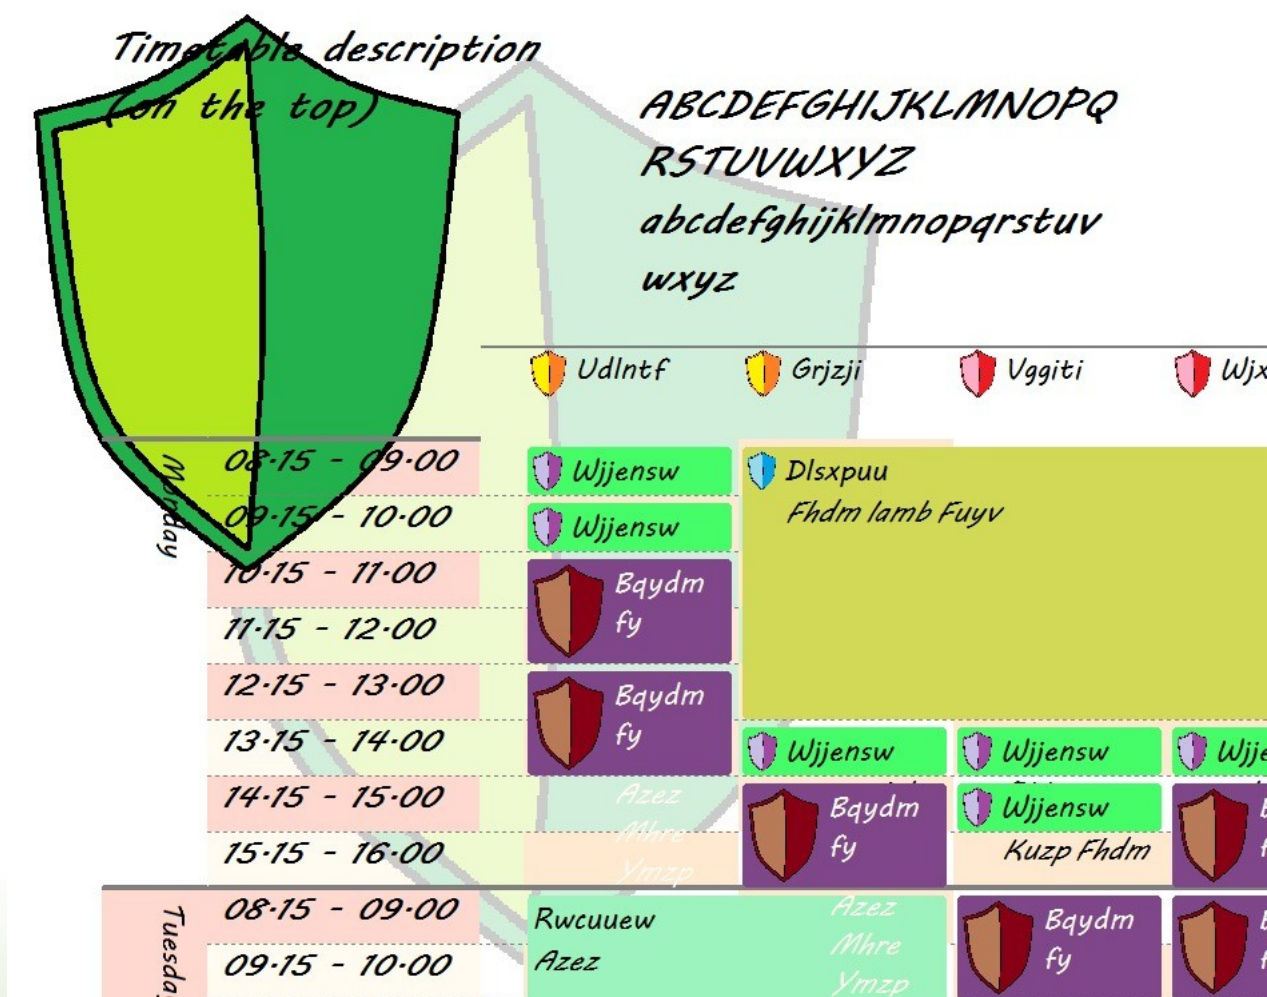

Right - level of the illustration in the plan presentation,
(obscuring relative to other objects)

Left - pointing to the location of the illustration file on the computer

Setting the illustration in the window is done after previewing in the **Results - Export and Print** window. To set the illustration drawing, the upper left and lower right corners of the image are indicated in the **Illustration Position** window.

The effect of using the background and typeface parameter settings from the *Main menu - Settings - Visual parameters* is to improve the readability of the presentation of the plan diagram and to be able to mark the presentation with illustrations. Example:

The course of arranging the timetable

1. Determine the number of tasks, groups and rooms

The sliders are located in the tabs of the main form and are activated by an option from the main menu:

Settings - Visual Parameters - Change the number.

Set the number of groups, classes (tabs "**Tasks**", "**Groups**" and "**Rooms**" in the main form)

Note: reducing the number of individual features causes deletion - it is best to disable the option after setting

You can also start a new plan with the *File - New* option, specifying at once the established number of tasks, groups and rooms, which can be modified later.

2. Specify the names of groups, tasks and rooms (Settings - Names).

The '/' sign before the name of the task (activity) means division with another task (diagonal)

mark '|' in front of the name of the task (activity) means division with another task (vertical)

the character '\' in front of the name of a task (activity) means division into two triangles

The character '/' before the name of the group or position means setting the preceding vertical dash, of the color specified in the "Parameters" window

Direct them to the main table (the "to table" buttons in the Tasks, Groups and Rooms tabs of the **Names** window)

3. Determine the number of hours per day

- number of hours for a cycle (Main Form - Cycle)

and the estimated number of cycles (Main form - N. Cycles)

4. Enter the name of the cycles (days) and the names of the time units of the plan (hours)

(Results - Export and print)

5. Main form - "Tasks" tab:

Specify the time required to complete the tasks ("**duration**")

Specify for the lectures the range of groups involved ("**gr.first**" - "**gr.last**")

Groups falling within this range will be assigned to a task if the number of task completion for them is greater than 0 (the "Groups" tab of the main form)

If exercises are planned for individual groups then the range ("**gr.first**" - "**gr.last**") can be omitted or zeroes can be entered

Specify the minimum number of classrooms for tasks ("**rooms.min**")

Specify the maximum number of such tasks running simultaneously ("**subjects.max.**")

Specify the moment when the task starts (optional, if not at the beginning) ("**start**")

Specify the size of the break after the task (optional, if not zero) ("**break**")

Specify the color for the selected tasks (*Settings - Visual parameters*)

The right mouse button gives information about the occupancy of groups and rooms for a given task

6. Master Form - "Groups" tab:

Specify how many times a task must be performed by a group

The right mouse button activates the menu giving the range of selected groups, deleting and adding tasks and groups

7. Main Form - "Rooms" tab:

Indicate the classrooms that can or must be used for a specific task

Right mouse button activates the menu deleting and adding rooms (classrooms)

8. Assumptions (optional) (Settings - Assumptions):

Provide lists of different tasks that cannot be performed simultaneously (there must be one blank at the end of the list of conditions),
This applies, for example, to tasks performed by a single teacher

9. Results - Arrangement - Scheme.

Perform the distribution of the plan

Displaying the plan in the "**Arrangement**" window is done using the buttons from the "**Results**" window.

These are:

"**In order**" - Arrange the plan as the tasks have been placed in the table "Tasks"

"**Random**" - plan according to randomly set tasks (different combinations)

"**Sorted**" - the plan set for the tasks, sorted according to the occupancy of the groups (first lectures or their completion time) from the largest to the smallest

"**Results**" window controls the display of the scheme in the "Arrangement" window. It sets:

"**Groups**" - distribution for groups

"**Rooms**" - distribution of occupancy of rooms

"**Selected tasks**" - tasks selected to be displayed for, for example, a single workplace selected from the entire schedule

Buttons in the "**Arrangement**" window (after selecting the display in the "**Results**" window):

"**Groups**" option in the "**Results**" window:

left - change the status of the task (exercise or lecture)

- unmarked (smooth)

- marked for movement (hatched)

- blocked - reserved (check)

right - to move the view and enable the menu to select the passage,
to lock or unlock a schematic fragment

Ctrl or **Wheel** (mouse wheel) - moving the selected tasks in time
(confirmed by the "**Transfer**" button in the **Results** window)

Information about problems given while moving the task:

marked in red - setting on a locked task

marked in yellow - the indicated rooms are already blocked or occupied by blocked tasks
marked in white - the location of the task does not meet the list of given conditions
or the task is simultaneously implemented in too many groups
marked in gray - location of the task simultaneously in two cycles
(all contingencies cannot be accepted)

Alt - change the assignment of rooms to the blocked task, shown by the cursor
(positions excluded from the list, are blocked or occupied by blocked tasks)

"Rooms" option in the **"Results"** window:

left - reservation - blocking of rooms (positions)

right - moving the view

red are marked rooms with overbooking (several tasks to one room)

or inconsistency of the declared task time with the performed reservation

Information about errors in the scheme is shown as black rectangles and red underlines (they refer to differences between the table and the scheme)

10. Results - Report and control

Checking the correctness of the solution (whether the rooms are not repeated at a given time). The last error is shown on the preview as a red horizontal line.

11. Parameters (Settings - Visual parameters)

Preparation for presentation

Set typeface and size

Set the dimensions of the unit on the plan

Set colors for task groups (marked in the main form, right table)

12. Results - Export and print

Prepare the image of the diagram for printing

Set the position of the upper left corner of the range

Specify the range in the number of groups - to the right and time - to the bottom

Have a pleasant work :-D

Information about the program

The project was done with the following tools:

Lazarus IDE 2.0 - 3.2: <https://www.lazarus-ide.org/>
<https://indy.fulgan.com/SSL/>
<http://www.ararat.cz/synapse/doku.php/start>
<http://www.famfamfam.com/lab/icons/silk/>
http://tango.freedesktop.org/Tango_Icon_Library

Program tests and current compilations are performed in the environments:

Windows® 7 64bit Home Premium Sp1, AMD® FX-8320E, 16 GB RAM,
Windows® 10 64bit Pro 22H2, AMD® Ryzen 5 Pro 4650G, 32 GB RAM,
Graphics: AMD® Ryzen 5 Pro 4650G,
Nvidia® GTX 1060 6GB, RTX 4070 12GB,
monitor 4K 60Hz.

64 bit program parameters:

Groups: 500; Tasks: 900; Rooms: 200; Conditions: 100
Selected presentation tasks: 100; Time: 3000 units.
Internet connection required for date checking.

Demo 64 bit program parameters:

Groups: 3; Tasks: 3; Rooms: 3; Conditions: 3
Selected presentation tasks: 3; Time: 100 units
No ability to edit task names and parameters.
No read and write capabilities.

Contact the author: info@mkplan.eu

Installation

Installing the normal version of the program is done on the user's permanent disk. No modifications are made to the system. The program works as a portable version. Realized, for this purpose, are the following points:

- Create a directory, for placing the program, on the fixed disk.
- Place there all the files from the unpacked file "Program_plan.zip"
- Run the executable file "Serial_info.exe", specifying the main path of the drive, intended to install the program, for example, "C:\".
- Send the obtained control file "info.exc" to us and declare the period of use of the program (one year or more), according to the payment made.
- We will send the computer reference file "serial.exc".
- Put the "serial.exc" file in the directory with the program, which was established at the beginning.
- Now the main program should work, you can create a shortcut to it.

Note ! An Internet connection is required for the program to work.

Examples of lesson plan presentations for groups and positions

It is possible to select any range of groups or rooms, as well as selected tasks, for presentation.

Horizontal plan

Single group:
