Web Developer with expertise in crafting dynamic web applications using Angular, enhancing user experience through efficient Single Page Applications (SPAs). Designed engaging interfaces with Sass and Bootstrap, improving usability significantly. Collaborated with cross-functional teams to implement innovative features, demonstrating proficiency in HTML5, CSS3, JavaScript, and C++. Delivers creative solutions that drive project success and encourage collaboration.

Work Experience

02/2022 – 12/2023
Amman, Jordan

Front-end Web Developer

Harmony IT Solution LLC

- Led the design and development of web applications using the Angular framework, creating Single Page Applications (SPAs) with advanced data binding functionalities which improved user interactions.
- Implemented Sass, Bootstrap, and Angular to enhance both the functionality and visual appeal of web applications, resulting in a more engaging user experience.
- Collaborated with a team of developers to conceptualize and seamlessly integrate new features within the Angular framework, which helped streamline our development process.
- Engineered responsive web designs using CSS3 and Bootstrap for multiple pages, ensuring a consistent and optimal viewing experience across devices.
- Crafted dynamic web pages by utilizing HTML/CSS and JavaScript in a fast-paced environment, which allowed us to quickly respond to changing project requirements.
- Demonstrated expertise in HTML5, CSS3, JavaScript, Sass, Bootstrap, and Angular technologies, contributing to the overall skill set of the team and improving project outcomes.

10/2020 – 12/2020
Amman, Jordan

Web Developer Intern

Aspire, Jordan

- Trained in web development using Drupal CMS technology, which laid a strong foundation in understanding content management systems and their functionalities.
- Assisted in implementing design changes that enhanced the overall site aesthetics, leading to a more engaging experience for users and resulting in higher interaction rates.

Projects

Bank Console App

A C++ console-based banking application that simulates basic account operations such as deposit, withdrawal, and balance inquiry. Designed to practice object-oriented programming.

- <https://github.com/ahmadalkurdi2/OOP-Bank-Project>

Rock Paper Scissors Game

A simple C++ console game that lets you play Rock-Paper-Scissors against the computer. Built to practice control structures, randomization, and user interaction in C++.

- <https://github.com/ahmadalkurdi2/Rock-Paper-Scissors-Game>

Math Quiz Game

A C++ console-based math quiz game that generates random arithmetic questions for the user. Designed to strengthen problem-solving skills while practicing loops, conditionals, and user input handling.

- <https://github.com/ahmadalkurdi2/Math-Quiz-Game>

Pizza Order

Developed a pizza ordering application using C# and WinForms(Windows Forms) on the ASP.NET framework, featuring an intuitive UI and efficient input validation to enhance user experience and reliability.

- <https://github.com/ahmadalkurdi2/Pizza-Order-Project.git>

UI Design Projects

Developed responsive designs utilizing Flexbox and Grid layout techniques, which ensured a consistent user experience across various devices and screen sizes. Implemented the Bootstrap framework to streamline the development process, helping to significantly reduce project completion time and allowing for faster delivery to clients.

- <https://github.com/ahmadalkurdi2/UI-Web-Design.git>

Angular-Todo

Developed an Angular-based to-do application, which allowed users to efficiently add, delete, and edit their tasks.

- <https://github.com/ahmadalkurdi2/Angular-Todo.git>
